

M365 Threat Protection Implementation

"Stay one step ahead of cyber threats with Microsoft 365 Threat Protection - your shield in the digital battlefield."

Overview

Microsoft 365 - Threat Protection Implementation includes the following topics to help you develop a strategic plan based on your organizational needs while leveraging Agilis' expertise in security.

Scope

As Agilis Technology Solutions we provide you with following procedures as in the scope of M365 Threat Protection Implementation,

- Secure Score analyses your company's security and assigns a rating based on the normal activity and security settings of Office 365
- Threat Check provides your organization a comprehensive security assessment by analyzing cyber threats.
- Our holistic approach helps companies prevent vulnerabilities against threats.
- Based on your business needs, Agilis provides you with a detailed evaluation of your IT and security posture.
- By using cutting-edge technology, you will have a seamless experience in reporting and security tools.

Gain visibility into potential threats in E-mail, identity, endpoint, application, and data. These insights allow you to obtain a clear vision and support your organization to fortify your security posture.

Considering the volume and complexity of identities, data, applications, devices, and infrastructure, it's critical to learn **how secure your organization is now & how to mitigate threats and maintain security against future threats.**

Benefits

- Learning ways to improve your security posture
- Identifying current and ongoing risks to your cloud environment
- How to take action based on your specific needs and goals
- Scaling up your security strategies to international standards

Why Agilis ?

- Increase efficiency in operations and processes
- Fast and cost-effective technology adaptation
- Compliance with international standards

%88

of engagements, MFA was not implemented for sensitive and high privileged accounts
