Accelerate your cloud adoption with confidence. Bitscape following Microsoft Best Practice understand your security posture and confidently leverage your IT Infrastructure to increase your business agility both efficiently and securely.

> The Modernization Solution from Microsoft Services provides a comprehensive approach to move applications, data and infrastructure to an enterprise ready cloud.

Strategy Process

Bitscape Intelligent strategic Plan for its Customers.

1. We help navigate real-life challenges
2. Help in Develop a business case.
3. Bitscape has designed the Microsoft Azure Readiness Assessment and Microsoft Azure Migration Roadmap programs that allow organizations to begin their migration with a clear focus and strategic plan

Plan

Bitscape plays a direct role in powering businesses and supporting operations.

1. Assessing your digital estate.
2. Align people across different cloud teams.
3. A road map to create a cloud adoption plan to manage change.

Ready

Prepare the cloud environment for planned changes.

1. Review the organization posture and set up your cloud environment.
2. We will create your migration landing zone to get started with the cloud journey.

Adopt

Bitscape will help in adopting the most optimized Cloud Adoption Plan for smooth transition.

Migrate
We will help migrating to the cloud following the process of Assess, Migrate, Optimize, and Secure & Manage.

Innovate
We take advantage of cloud-native technologies and modernize solutions.

> Migrating to the cloud is not just about improving scalability and security. It's also about improving your financial resilience by shifting from a traditional upfront expenditure to a more flexible pricing model.

> **Afraid of Security & Compliance?**
> Governance is a big, intimidating topic. Establish proper scope by mitigating tangible risks through corporate policy. We at Bitscape has one objective, to create Balance. Fulfilling customers governance model through Control & Stability, achieving speed & result.

Govern

Governance is a team sport. We as a team resolve by decomposing corporate policy changes into three actionable disciplines.

1. Security Baseline: Ensure compliance with IT requirements.
2. Resource Consistency: Streamlined management with accelerated deployment.
3. Identity Baseline: Ensuring Baselines applying Role Definitions and Assignments.

Manage

We Manage outlines on how to establish tooling for a management baseline.

1. Inventory and Visibility: Create an inventory of assets across multiple clouds
2. Operational Compliance: Ensure each state is properly configured and running in a well-governed environment.
3. Protect and Recover: Ensure all managed assets are protected and can be recovered using baseline management tooling.
