vEngage
Employee Communication Delivery Services Implementation

Bitscape's "vEngage" services enable your organization with a rich digital employee experience and serve as an employee communication application that curates the content and tools you want to deliver to your employees, be it your intranet or other resources directly inside Microsoft Teams powered by Microsoft Viva Connection.

Overview

Bitscape's "vEngage" is a 4-6 weeks implementation service that uniquely maps your internal departments or teams through Microsoft Viva Connections and Bitscape's employee experience expertise. Microsoft Viva Connection is built on Microsoft 365 ecosystem and powered by SharePoint to help you engage, inform, and empower your hybrid workforce. It helps organizations build meaningful connections by enabling employees to quickly discover relevant communications, communities, and tools from a single window.

Business
Benefits

1 Get more value and engagement of your investment in various collaboration tools such as SharePoint Intranet.

2 Improve Productivity, loyalty, and engagement of your employees to help them focus on the task by enabling multiple information access from one window.

3 Save Time - The solution provides a centralized pane view within a single dashboard.

4 Improved Collaboration - It connects employees to cross-functional teams directly and allows them to discuss queries on a one-to-one basis. - it encourages the enablement of employees to discover relevant communications and communities easily.
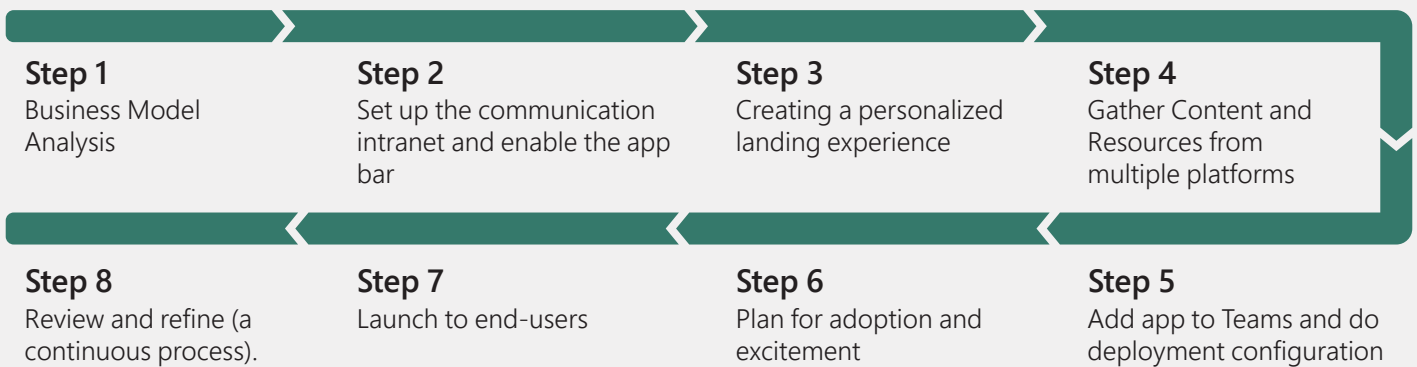

5 Increases Mobility – This solution helps the employees achieve mobility by accessing devices anytime, anywhere.

How Bitscape can help you in your journey

The solution leverages multiple features of communications, resources, knowledge, and insights using the Microsoft Teams framework.

We offer review, consulting, and advisory services during our engagement to help you roll out your employee communication solution in teams by enabling Microsoft Viva app and adding the additional value of Bitscape's employee experience expertise. In our typical engagement, we will set up and launch Viva Connections in generally 8 steps process.

Step 1
Business Model Analysis

Step 2
Set up the communication intranet and enable the app bar

Step 3
Creating a personalized landing experience

Step 4
Gather Content and Resources from multiple platforms

Step 8
Review and refine (a continuous process).

Step 7
Launch to end-users

Step 6
Plan for adoption and excitement

Step 5
Add app to Teams and do deployment configuration

Why Bitscape?

With an extensive employee experience practice, and collaboration expertise of tools such as SharePoint and Microsoft Teams, Bitscape can help you envision your desired state - one that brings people, data, and applications together in a single customized dashboard. Our team will work with you to understand your priorities, challenges, and culture to design a solution that meets your needs.

Bitscape introduces vEngage, a collaborative services delivery for connectivity between employees, and the imperative technologies powered by Microsoft Viva Connection. vEngage brings together business applications and internal systems aggregated relevant to employee information, resources, tasks, and content that empower employees' work productivity, increase mobility, collaboration, and save time. Our experts will help you identify use cases that expand beyond HR and goes departmental as we work with you and deliver the services.
