Achieve immediate benefits

Nintex Workflow Cloud is everything you've come to expect from our cloud-first software solutions and more. With the power of the Nintex Process Platform, you have easy-to-use process mapping and automation tools at your fingertips to rapidly accelerate your company's enterprise-wide digital transformation.

Complete digital transformation toolkit

Leverage process management and end-to-end automation with Nintex Workflow Cloud's integrated capabilities for process mapping, robotic process automation (RPA), workflow, forms, mobile apps, DocGen®, eSign and process analytics.

Deep cross-platform integrations

Integrate current and new workflows with existing systems of record. Whether your organization invests in Microsoft 365, Google, Salesforce, legacy or on-premises tools, or anything in between, Nintex Workflow Cloud easily connects people, processes and content.

Unrivaled user experience

Delight your customers and employees with modern digital experiences with Nintex Workflow Cloud's easy-to-use tools – with clicks, not code – for quickly managing, automating and optimizing workflows and business processes.

Experience common use cases with Nintex Workflow Cloud

Manage and expedite recruitment and onboarding effectively with automated processes across departments during every stage, from discovering new talent to ensuring a smooth first day on the job.

— *Employee onboarding*

Supporting a governed Teams provisioning process and lifecycle management, including Team and channel creation, member management through to archival.

— *Microsoft Teams integration*

Gather and store important data from users, not in your ecosystem.

— *Anonymous forms for customers*

Automate and standardize data entry into Salesforce from various stakeholders within your business.

— *Salesforce integration*
