# Predict Patient Visits

Understand what drives patient visits

When you provide weekly patient volume, Aidan harnesses Artificial Intelligence and Machine Learning so that you can:

- see a correlation analysis on what drives your patient demand
- predict patient demand for new and existing patients
- make strategic decisions based on insights from real data
- gain insights to better manage staff

Take the guesswork out of decision-making.

Aidan will provide easy to understand analysis so you can see what drives your patient visit volume
