

C-Facts

Your control center for sustainable cloud services

The Challenge

Governance of Public Cloud

With your companies success depending more and more on your ability to embrace and adapt Public Cloud services, you face the following challenges:

- Get insight across these services to mitigate business risk and obtain your license to operate
- Gain control of the costs of multiple cloud services and commercial models
- Optimize your cloud footprint

You need a single pane of glass to show proof of a sustainable business model to all stakeholders.

The Solution

Full Transparency and Control

We put business management in the driver's seat by offering a ready to use dashboard with a three-step onboarding process with minimal need for IT involvement;

- 1 Sign up to C-Facts
- 2 Enter your Public Cloud credentials
- 3 Configure the view of your data

The C-Facts Management Control Center provides insight and control in Public Cloud usage in a transparent, compliant and sustainable way.

We do this via a flexible and future-proof Business Management focused SaaS-solution. This solution can connect to any relevant external system used by your company.

Using one or multiple Public Clouds

C-Facts Control Center

The C-Facts service

We offer a single pane of glass that gives you full insight in your public cloud usage whether you have several accounts in one public cloud or accounts across multiple public clouds.

Cost Insights

Never miss a beat with the C-Facts visualization and allocation of costs to customers and cost centers. We reduce the complexity of cost allocation by selecting the right tags, while informing you on costs that are not allocated.

Commerce Insights

Whether you need to cross charge your departments or create pro forma billing for your customers C-Facts enables you to ad overhead costs, margins and discounts giving your stakeholders the insights they need with the correct amounts.

Customer Insights

Insights are needed at different levels of your organization or required by your customers. We let you create specific data views that you share via the C-facts Control Center to all relevant stakeholders, thus giving them an always up to date single source of truth.

About C-Facts

Convinced that the capabilities of current solutions could be much better in terms of control and insight, Martijn van Zoeren and Frits Veltink founded C-Facts. Two Cloud- and SaaS-veterans that have experienced first-hand the challenge of governing Public Cloud solutions and both having a deep understanding of customer needs and problems, they decided to develop the C-Facts platform.
