

# YOUR SOLUTION FOR SECURE & ADAPTABLE CROSS-PLATFORM CALENDARING IN TEAMS

Introducing the new way to enjoy full-functioning collaboration between G-Suite and Teams accounts

## What is CalendarConnect?

Does your organization primarily operate in G-Suite, but are finding the need to access and set meetings in Teams? For many, the lack of calendar access and ability to schedule or join Teams meetings is a problem. Since meetings require a Microsoft mailbox, those without one are simply not able to fully collaborate in the Teams platform. CalendarConnect makes it possible to sync your Google calendar into your Teams application to show events, meetings, and dates simultaneously in both platforms.

CalendarConnect works both ways, so when you create an event in Google it shows up in Teams. Happen to be working in Teams and want to set a meeting to show up in your G-Calendar? No problem – set the meeting in Teams and it will show up on you Google Calendar. It's auto-magic! Finally work on your terms, without limits.

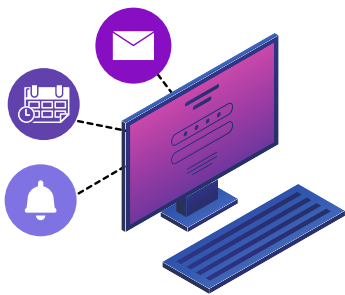

Bi-directional calendar syncing

Share calendars across Google & Teams

Security-first calendar syncing

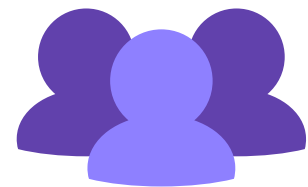

### Connect your Google Calendar to Teams & Sync in Seconds

Organizations using the Google platform are often unsatisfied with the collaboration experience and options provided within Google and would like to use Teams for collaboration. CalendarConnect provides the functionality to fully collaborate in Teams while still on Google, without the need of the usual Microsoft mailbox to make it work.

#### Experience CalendarConnect:

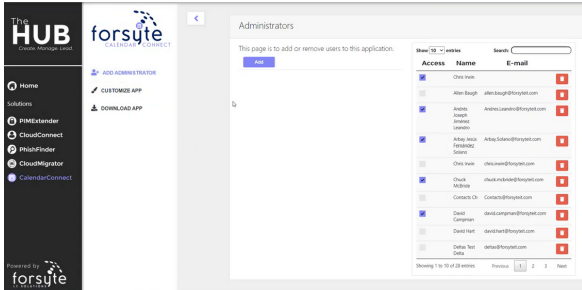

- Synch any existing Google calendar
- G-Cal colors are reflected in the Teams calendar app
- Get support for both administrators and users of the product
- Brand your CalendarConnect app with your organization's colors and logo
- Connect your personal G-Calendar

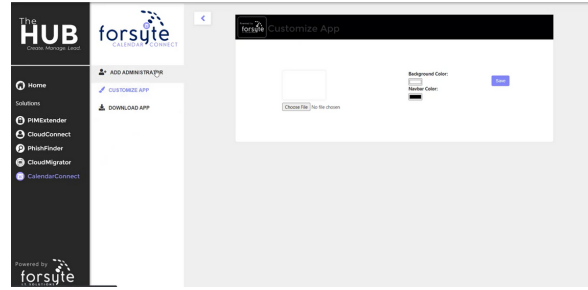

**B2B Calendar** made simple.

# Increase productivity with bi-directional syncing of Google & Teams calendars

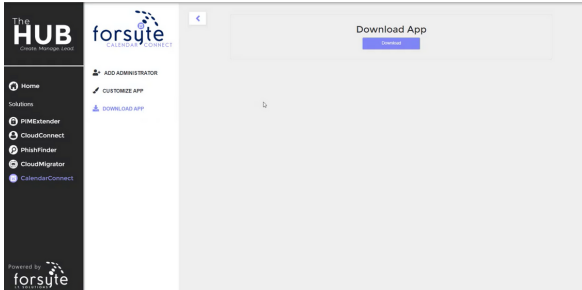

CalendarConnect removes roadblocks between effectively accessing Google and Teams platforms for collaboration. Seamless transitions and automatic syncing between your Teams and Google calendars allows for increased productivity and flexibility wherever you are.
