Real-time cargo movement /w Temperature Monitoring

- Delivers Ice-cream on time and in good condition by continuously monitoring the ice-cream temperature and location.
- Alerts on temperature range violations.
- Monitoring prevents ice-cream damages during transit.

Cargo Temperature Review

Temperature Graph of cargo provides you with detailed point-to-point temperature history of the Cargo. This can be used in Quality Control and ensuring cargo movers are pro-active to quality.

Improving fleet utilization

- Eliminates unintended halts achieving higher utilization of fleet.

Accurate Pay per kilometer

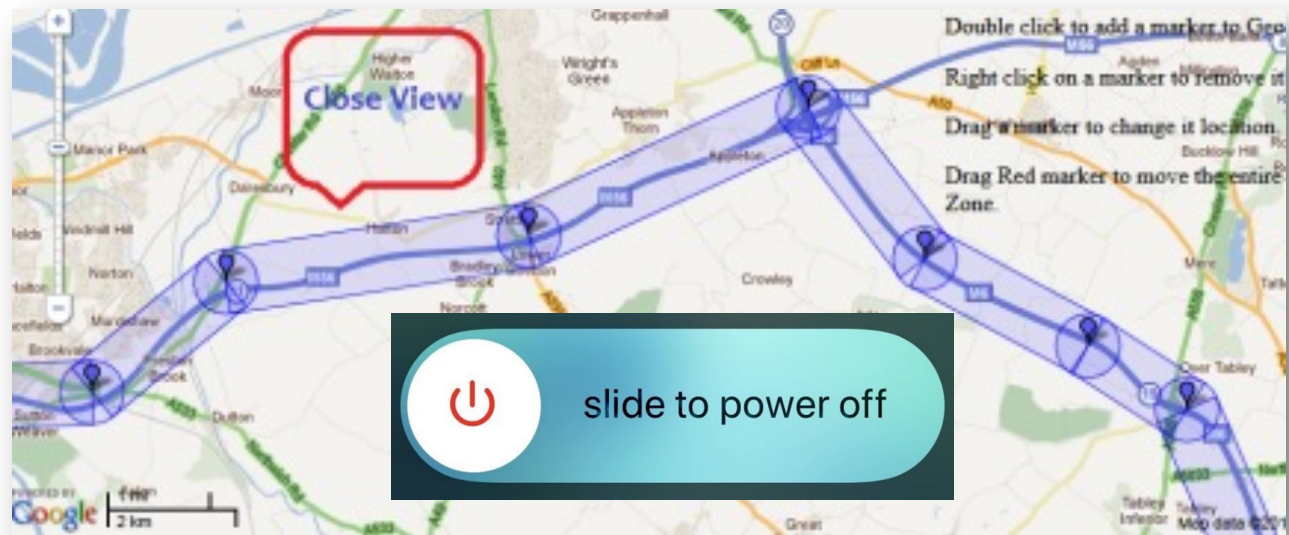

Vehicle	Total Distance
GJ16-Z-7566	☑ 301 km
GJ12-AZ-1372	☑ 264 km
GJ1-CX-1606	☑ 254 km
GJ05-UU-9343	☑ 224 km
GJ19-U-4042	☑ 107 km
GJ06-AT-2309	☑ 5 km
GJ01-DX-5784	☑ 0.0 km
GJ01-DU-2828	☑ 0.0 km
GJ01-DV-7593	☑ 0.0 km
	1156 km

- Eliminates financial leakages by 50% using Locanix *"PayPerKm"*.
- No more overpay due to Odometer manipulation.

Securing expensive cargo

- Prevents theft of highly valuable copper while in transit.
- Vehicle is locked down as soon as it deviates from the prescribed route beyond a threshold.

Preventing vehicle misuse

Night Driving (kms)	AC Misuse (hrs)	Risky Driving (kms)
244	78	86

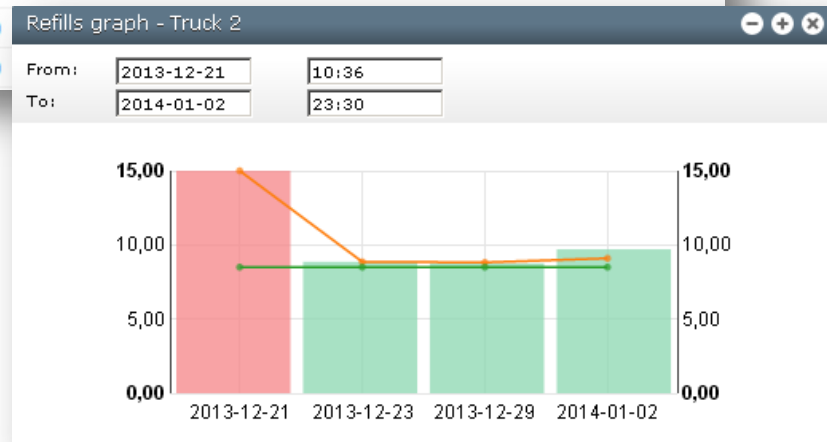

- Pro-actively ensures safety by preventing night driving of test-drive cars.
- Saves a lot by preventing AC mis-use in during the night hours.

Driver Behaviour Analysis

It's important to have a clear visibility on whether all your drivers are visiting predefined routes/locations or not. And most importantly they are not spending excessive time on those locations. Above BI report answers exactly the same questions

Third Party Sharing for Cargo Tracking

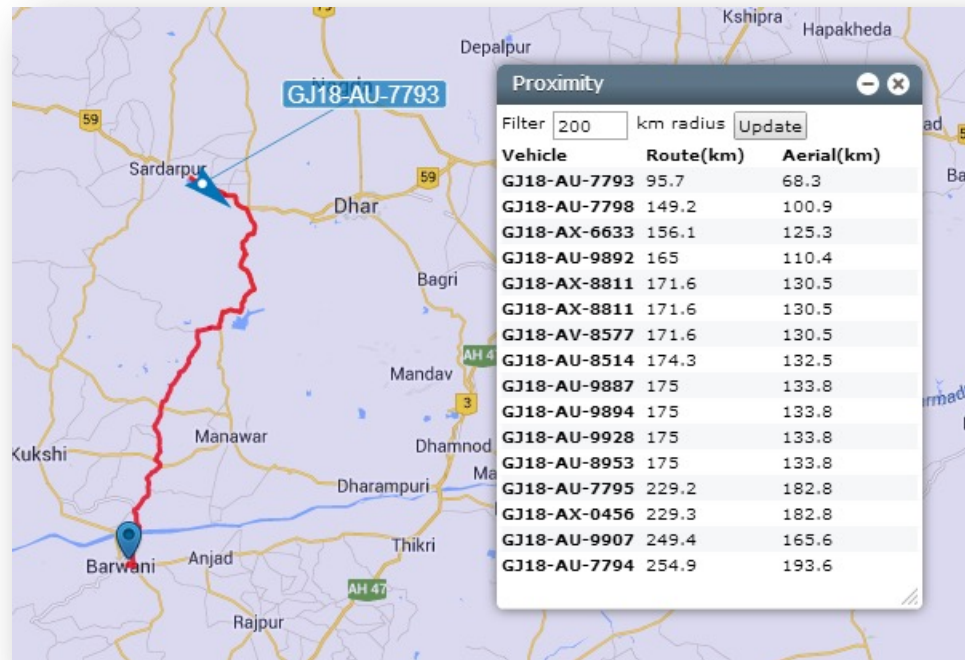

The screenshot shows a web application window titled "TrackingTool". It features several input fields and buttons. The "Mode" dropdown is set to "Vehicle". The "Name" dropdown is set to "GJ11-TT-4848". The "Valid from date" is "2016-07-15 12:19" and the "Valid to date" is "2016-07-19 12:19". There are two buttons: "Create tracking code" and "View stored codes". A large QR code is displayed on the right side. Below the QR code, a tracking code is shown in green: **93489I34569564341358**. Below the tracking code, a URL is displayed: <http://server2.locanix.net/TrackingTool/?t=93489I34569564341358>. At the bottom, there is an email input field containing "hitesh.parmar@locanix.com" and a "Send email" button.

You don't have to share your login credentials anymore to share the location of your vehicle. Just create a tracking code and allow your customers to track your vehicle for a limited time period. With this, you can generate your own "tracking-codes" like DHL and Fedex.

Proximity Based Assistance

With Proximity Based Assistance, you can find all the vehicles available within the given radius of a vehicle or location and calculate time and cost to serve the location in case if refrigerated cargo breaks down and has perishable cargo which needs to be transferred to other vehicle so as to ensure cargo is safe and delivered on time.
