SYVIR®

SYVIR RS

RS

Remote Specifications.

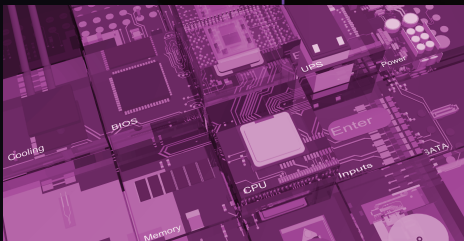

Syvir RS enables system administrators to retrieve Specifications on endpoints.

Check your remote Windows PCs, Servers, VMware and Hyper-V Specifications with SYVIR RS.

Specification data is saved to the cloud. Data is viewed through a web browser.

WWW.SYVIR.COM

SYVIR®

Manage endpoints from anywhere in the world.

RS

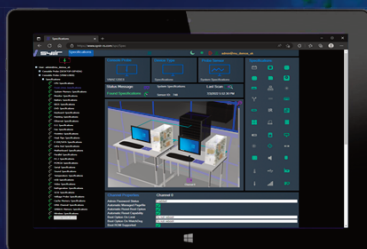

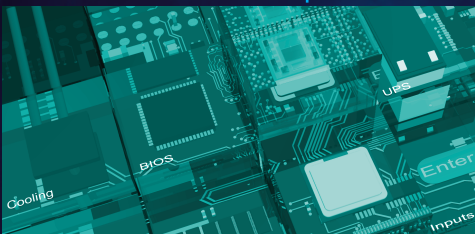

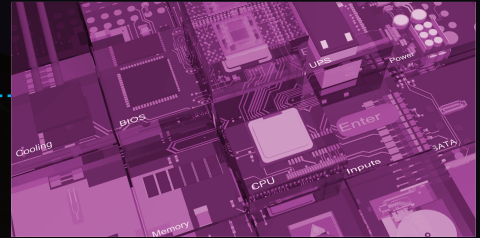

Syvir Remote Specifications is the easy way to find your hardware endpoints specifications.

SYVIR RS works through a small program on the target PC, Server or virtual machine.

Run the client software on the machine through Remote Desktop.

Specification data is transferred from the console probe to the SYVIR RS cloud.

You can then view Specifications data through your web browser.
