DISCOVERY SESSION

Traditional vs. Modern SecOps: 3 Critical Evolutions

You've undoubtedly heard the term Modern SecOps. However, the elements of what comprise a Modern Security Operations strategy aren't universally understood.

Is Modern SecOps just a buzz term? Does the framework and tactical mix differ from what I'm doing today? What value does it drive for my business?

Join Ascent experts for a complimentary discovery session. We will explain the critical people, process, and technology evolutions necessary to modernize your security operations strategy and optimize your posture against new and emerging threats.

This session will cover the business challenges and value realized by achieving a true Modern SecOps foundation. IT leadership will be challenged to think of people, process, and technology hierarchically to optimize the intelligence of their teams and better leverage their existing Microsoft technology.

Firms will learn:

 <p>Traditional vs Modern SecOps</p>	 <p>How to shape a company culture for Modern SecOps adoption</p>
 <p>Intel-driven, risk-based processes to better understand the threats specific to their industry</p>	 <p>How to drive efficiency through existing Microsoft technology investments + technology-enabled services</p>

ABOUT ASCENT

Ascent is the tech-enabled services partner to solve the most challenging cybersecurity problems. The firm is built to evolve cybersecurity posture, modernize Microsoft solutions, and manage entire security ecosystems. Ascent's consulting excellence and Cy:lent software suite provide organizations with the Modern SecOps core needed to accelerate a safer tomorrow. For more information visit www.meetascent.com.
