

**ongil.ai**

**Puts an entire analytics  
team in a business  
user's pocket**

# Why can't business users get to insights?

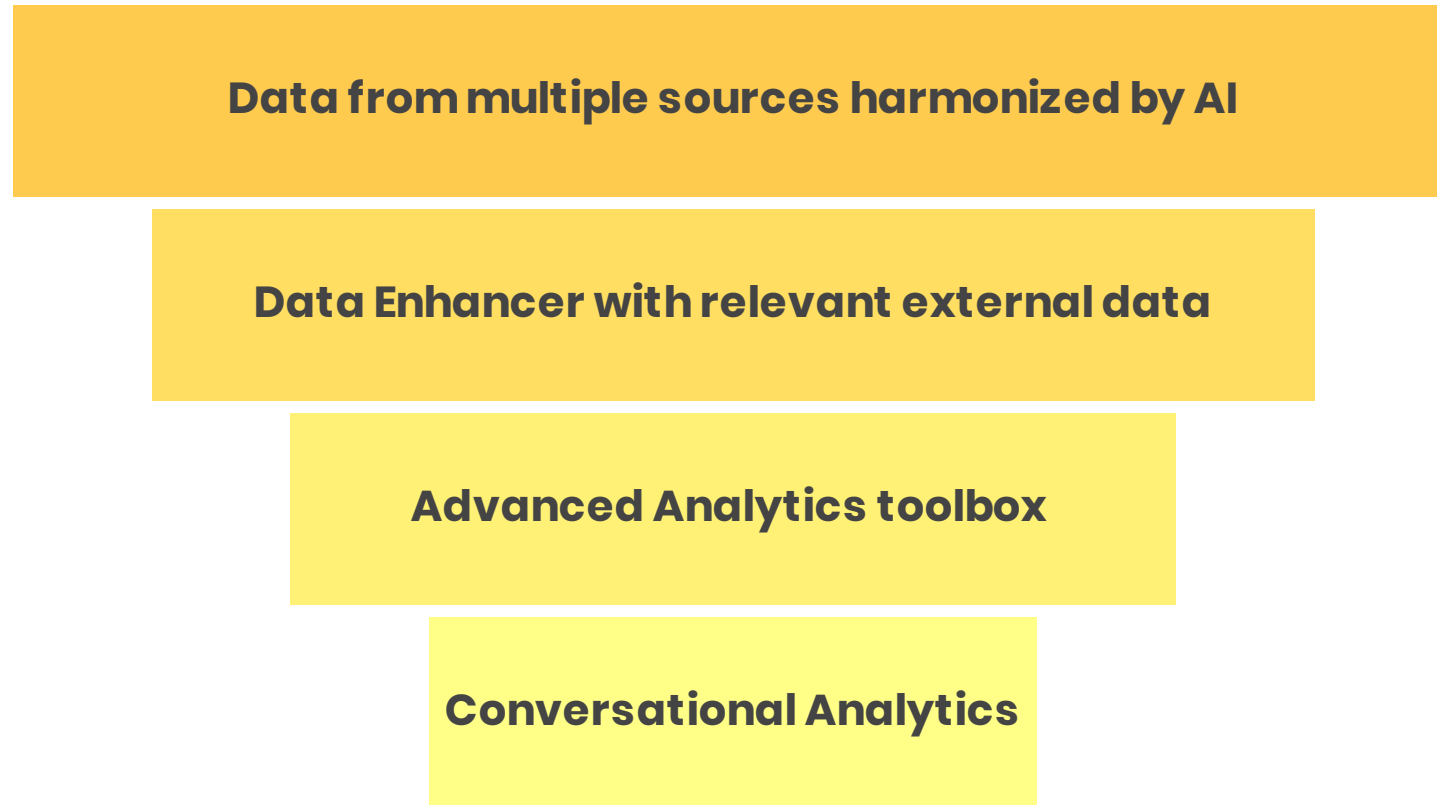

**Data from different sources may not be preprocessed or harmonized.**

**Business users need personalized insights; data is structured to provide generic info**

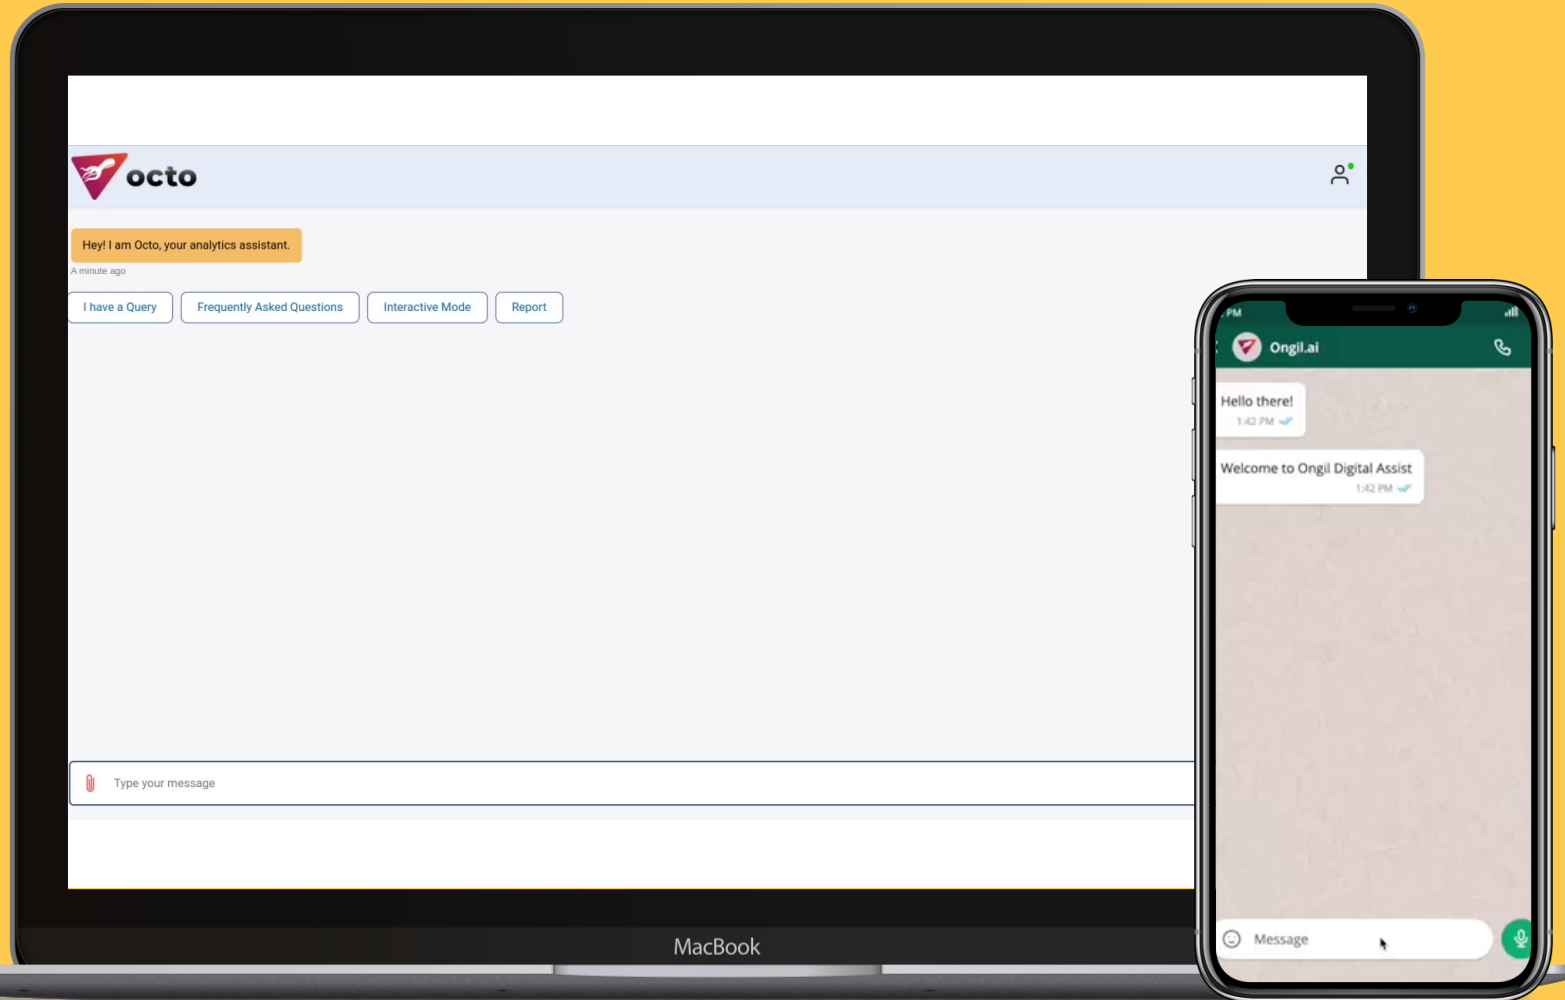

**Complex questions require weeks if not months to get answers**

**Navigating multiple dashboards, drilling for detail is tedious.**

# How does Ongil.ai fit in an entire analytics team in a business users' palm?

# Analytics team at business users' fingertips

- Supports natural language analytics queries on structured, unstructured data.
- Handles unorganized data sources
- Even collects datasets on the go based on user need
- Produces complex analysis on the fly

# Ongil.ai Saves Companies Money by Allowing Them To Fully Access and Utilize Data

Faster Access

**5 Seconds**

From 2 Days earlier

Cost Saving

**\$15K/user**

Annual Savings by saving time

Data Utilization

**9X**

By doing away with static boards

**Each of our  
customer is  
the market  
leader in  
their  
category**

***“With Ongil we are able to monitor and rollout optimized pricing and promotion strategies across SEA to maximize channel potential and growth”***

**Claire Hennah**

**Global VP e-commerce, Unilever**
