

The Virtual Rep for commercial acceleration

The 1-click device bringing Pharma and Physicians closer

85% of physicians would try new “virtual service” technology to access sales reps.

Physicians seek new medical developments information. Pharmaceutical representatives traditionally act as key channels to supply drug related information, spanning new product development, updated literature or required samples.

Increasing workloads, decreasing resources and information saturation are impacting the relationships doctors once had with pharma reps and their companies.

Swittons is the end-to-end Enterprise IoT solution for commercial acceleration. From dashboard to device to data, Swittons powers seamless engagement between physicians, pharmaceutical representatives and their organizations. Swittons is powered by the technology and expertise of P360.

Why Swittons for Pharma.

- The gap between Physicians and Pharma is increasing
- Target whitespace and amplify new launches
- Only 44% of Physicians are accessible.
- The average physician gets about 2,800 contacts per year from a single pharma sales rep.
- 85% are willing to try new technologies, such as “virtual services,” to access sales reps.

Remote Functionality

Stand-alone or stacked, devices are at customer's fingertips for 1-click 1-action, easy ordering capability.

Agile Design

Each button can be programmed with a specific “Action” - from order placement to request a phone call - and can easily be updated to meet the needs of your changing business.

Advanced Security and Connectivity

FCC approved, Swittons are available in Wifi or GSM configurations, and with or without fingerprint authentication for various levels of security.

Easy Integration

Performed remotely, with minimal work for your customer, setup is a plug and play and provides seamless linkage to your existing CRM and ERP systems.

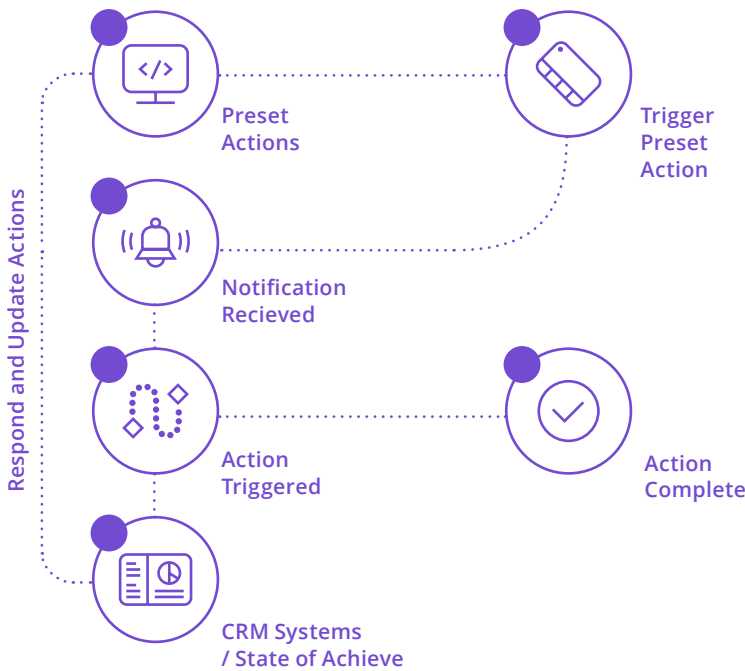

From dashboard to device to data, always on, scalable and updatable.

Endlessly customizable, remotely accessible, and easy to integrate into any CRM or ERP system, the Swittons device facilitate orders in a controlled, logical fashion.

Better engagement. Better data. Better intelligence.

From conception to completion, the information flow is designed for ease of initiation, transmission, and delivery.

The device programming provides simplicity at the user end - combined with the small device size, physicians are easily communicating their needs. Immediate action is triggered, stored and analyzed at lightning speed.

**Better Partnerships.
Better Design.
Better outcomes.**

Conquer Physician Access Problems

Penetrate whitespace where in-person visits are being controlled

One-Click Sample Ordering

Keep your samples stocked with simple, automated logistics

A Marketing Dream

Branded, functional marketing - your brand become ubiquitous with the Physician work environment
