

Digital Transformation

for

Golf Course Management, Membership & Golf Tournament

Rhapsody Golf & Membership is a complete solution to digitally manage every aspect of golf operation. It is a cloud-based system that delivers true digital transformation to control and automate every aspect of the golfer's journey.

By using Rhapsody Golf, golfers are given a smart-passport upon bag drop to be used as locker key and to charge outlet transactions into their folio. Meanwhile, members no longer need to bring a physical card because they can use biometric (face or fingerprint) as identifier to receive benefits. The impact of Rhapsody Golf & Membership is significant and backed by this system a digitally transformed golf and membership operations will definitely ensue.
