

Dynamic Demand Forecasting Production & Services

Plans

TIM InstantML SAAS for Alteryx – Retail Entry Pack

- TIM InstantML for Alteryx - Dynamic Demand Forecasting.
- This entry is for 10.000 forecasts per month.
- The plan covers all costs to make the TIM InstantML API available in your Alteryx Platform.

TIM with Data and Macros – Retail Entry Pack

- This package contains analytics-ready live data streams to leverage external factors as features in your TIM model deployment.
- Included in this offer:
 - Real-time historical and forecast data in a ready-to-ingest format for the TIM engine.
 - Augmentation of your sales data for geographic locations (either customers or brick-and-mortar stores).
 - Access to weather data sets, COVID case data (including tier restrictions), Demographics data (population, age, ethnicity), and Socio-economic indicators (employment rates, income levels, property prices).
 - The above data sets include a level of detail that varies by country, but it is at least at a county level for the US and provincial level for European markets.
 - Daily data updates for weather and COVID data and monthly updates for demographics and socio-economic data.
 - Licensed Alteryx macros that automate the generation of simulated scenarios for the external data sets using the TIM engine and recommend the most likely scenario based on actual error rates.

TIM with Data, Macros and Managed Service – Retail

- TIM InstantML for Alteryx - Dynamic Demand Forecasting.
- This entry is for 10.000 forecasts per month.
- The plan covers all costs to make the TIM InstantML API available in your Alteryx Platform.
- This package contains analytics-ready live data streams to leverage external factors as features in your TIM model deployment.
- Included in this offer:
 - Real-time historical and forecast data in a ready-to-ingest format for the TIM engine
 - Augmentation of your sales data for geographic locations (either customers or brick-and-mortar stores).
 - Access to weather data sets, COVID case data (including tier restrictions), Demographics data (population, age, ethnicity), and Socio-economic indicators (employment rates, income levels, property prices).
 - The above data sets include a level of detail that varies by country, but it is at least at a county level for the US and provincial level for European markets.
 - Daily data updates for weather and COVID data and monthly updates for demographics and socio-economic data.
 - Licensed Alteryx macros that automate the generation of simulated scenarios for the external data sets using the TIM engine and recommend the most likely scenario based on actual error rates.

TIM with Managed Service – Retail Entry Pack

- TIM InstantML for Alteryx - Dynamic Demand Forecasting.
- This entry is for 10,000 forecasts per month.
- The plan covers all costs to make the TIM InstantML API available in your Alteryx Platform.
- This package is designed to provide expert resources, training and support to help manage your project to ensure continuous improvement and model adoption.
- Included in this offer:
 - Services for integration of TIM engine with other Alteryx workflows, dashboards, and applications (up to 4 services days per month).
 - Continuous support of model iteration including monitoring model performance, model tuning and optimization.
 - Support all version upgrades to ensure ongoing support for TIM engine on the latest releases of Alteryx and TIM.
 - Tier 1 support for analysts.
 - Regular office hours and training sessions for new users and/or expanding use cases (up to 8 hours/month).
