

# Sentinel SIEM Quickstart

FREE 1-Week QuickStart and Advisory Engagement

The technology landscape is transforming at a pace never seen before, and will continue to do so in the years to come. Today's businesses now face a broad and growing array of security threats, from sophisticated hackers, to ransom ware attacks, to identity theft and more. The case for implementing modern security protections has never been so urgent.

In this engagement, Atmosera will deploy Microsoft Sentinel for your organization in one Azure subscription and then connect it to two data sources: Defender for Cloud, and Azure

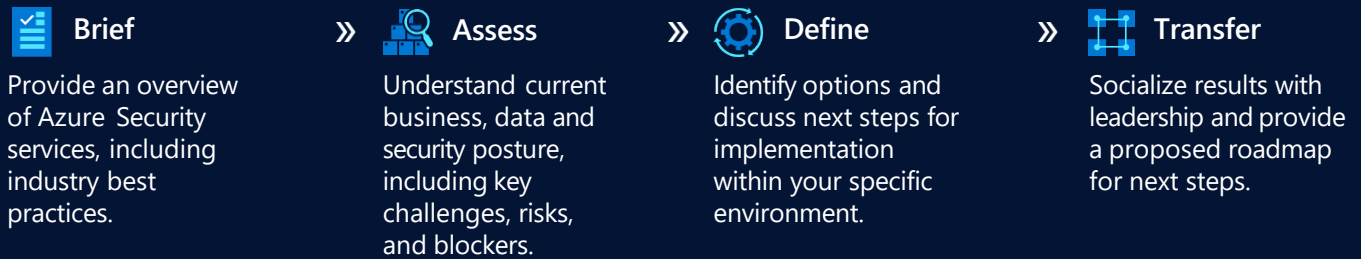

Active Directory. Sentinel will then begin to surface detailed threat insights from the environment, and after allowing time for data ingest and categorization, Atmosera will deliver a report on the findings along with suggested remediations to effectively secure your critical data.

Atmosera is a Microsoft Security Solution Partner (MSSP), an Azure Expert MSP and a Microsoft Gold Partner with multiple advanced specializations – the highest levels of recognition possible. We have deep experience with securing our customer's IT landscape from modern security threats.

## Protect your business with modern, robust, and sophisticated Azure Security services

In this engagement, we will meet with your team to understand their business, analyze the existing security environment, and then deploy an initial footprint of Microsoft Sentinel SIEM. Ultimately, a report will be presented with detailed findings and suggestions to better secure your business data.

### Example Delivery Process

### Final Deliverables

Duration: 2-5 Days Cost: FREE

Assessment of current Security environment

Next steps for security implementation

## Secure your digital landscape with the power of the Azure cloud
