

OneVoice Basic

Enhanced productivity and seamless communication in one easy to use solution

OneVoice Basic unifies Microsoft 365's collaborative capabilities with calling plans and Liquid Intelligent Technologies's carrier-grade voice network. Harnessing the power of Microsoft Teams and Office apps, it delivers a fully integrated communication solution that seamlessly incorporates calling, chat, team collaboration, and meetings into a single application.

OneVoice Basic is the next-generation telephony solution. Whether you want to replace your existing legacy PBX or extend its static capabilities, this platform gives you voice calls bundled with chat, meeting, and collaboration features. Designed for small and medium businesses, it enables you to leverage the cloud's infinite collaboration and productivity capabilities.

The integrated communication tool that does it all

Calling plans

We have built calling plans to make it simple for you to manage your business's telephony costs. Our calling plans are built to cater for all voice calling profiles.

Voice calls, chat, and meetings in a single app

Increase your productivity with a combination of calls, chats, and meetings using Microsoft Teams. Seamless integration with other Microsoft products offers a single view of your contacts and calendar as well as access to Word, Excel, and PowerPoint during calls and meetings.

Call from anywhere, using any device

Stay connected using the same phone number across your computer, mobile device, and desk phone. Make or receive calls and join meetings with a single click.

Enterprise cloud calling

Access enterprise features such as auto-attendant transfers, music on hold, call queues and shared cloud voicemail.

Collaborative calling solutions

Deliver an exceptional collaborative experience with solutions such as group call pickup, delegation, and shared line appearance.

Enhance customer experience

Ensure every customer call is answered professionally and routed to the right queue with Cloud Auto Attendants and call queues.

Simplified setup, billing, and management

Easily manage your voice solution from the familiar Microsoft 365 admin console. Add phone numbers in minutes, allocate users to groups, and enjoy the freedom of a cloud-based platform without the hassle and cost of maintaining a PBX.

Tried-and-trusted security

Keep your critical business data safe with Microsoft 365's built-in security features. Industry-leading encryption protocols, data leakage prevention and embedded operational processes ensure you always remain in control of your information.

Always accessible

Get peace of mind with uninterrupted access to your cloud-based services and critical data with a guaranteed uptime of 99.9%.

We're here for you

Located in key African geographies, our world-class data centres and dedicated support team provide the foundation and assistance you need to keep your business growing.

Leverage the cloud for better business outcomes
