

Out-of-the-box privacy compliance for healthcare

MedStack is a purpose-built solution that helps digital health innovators scale faster. We offer top-to-bottom privacy compliance, guaranteed, so you can focus your attention on building and selling your application.

What is MedStack?

MedStack is on a mission to solve the healthcare crisis by empowering innovators to easily build compliant applications right from the start.

Our platform is built with strong compliance guarantees to support the tools and infrastructure you need to build your application, with the privacy protocols and security architecture that the healthcare industry expects. We support data residency and healthcare data privacy expectations in multiple jurisdictions around the world.

Save **time**

Save **money**

Power & **flexibility**

Peace-of-mind

Sales **readiness**

What makes MedStack different?

MedStack's unique solution combines infrastructure, tooling, security and privacy compliance into a turnkey, all-in-one developer platform, including audit support for compliance readiness with real-time proof of documentation.

Infrastructure

Tooling

Security

Compliance

MedStack's **privacy compliance guarantees** are built-in and automated, giving you the proof you need to **start scaling**.

Encryption

Network Security

Monitoring

Audit Logging

Backups

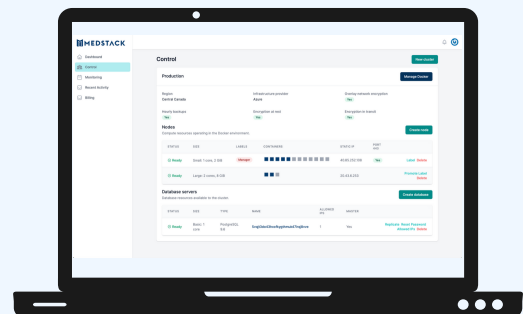

Certificate & Key Management

MEDSTACK|CONTROL

- ✓ Code-generated, real-time auditable policies
- ✓ Automatically integrated security frameworks
- ✓ Monitoring and audit logging
- ✓ Definable containers
- ✓ Set up, deploy and make changes in minutes

Administrative Safeguards
Legal paperwork, policies and procedures, training

Technical Safeguards
Encryption, network security, backups, monitoring, audit logging

Physical Safeguards
Data center security, disaster resilience

Most cloud services limit their responsibility to the physical security of its own networks and facilities. MedStack takes compliance guarantees to a much higher level to also include technical as well as administrative safeguards. Our services are pre-configured to be compliant for your protection so there's no guesswork needed.

What are you building in digital health? **Talk to us.**
