SYVIR - Visual Diagnostics Monitor

VDM

Monitor your endpoints for faults.

Specially designed to monitor PC endpoint diagnostics. Syvir- Visual Diagnostics Monitor enables you to do automatic diagnostic checks on endpoints for hardware faults.

Checks your Windows PCs for problems and failures. Receive alerts when issues are found.

Cloud based, view diagnostic information through a web browser.

Monitors the following PC components-

Battery, BIOS, Cache Memory, CPU, DMA Channel, Fixed Drive, DVD/CD, Ethernet, Fan, FireWire, Heat Pipe, Keyboard, E-IDE/SATA, InfraRed, Motherboard, Desktop Monitor, Parallel, PCI, PCMCIA, Pointing, PSU, Refrigeration, SCSI, Serial, SMBIOS Memory, Sound, System Memory, Temperature, USB, Video, Voltage, Wireless.

WWW.SYVIR.COM

SYVIR®

Monitor endpoints from anywhere in the world.

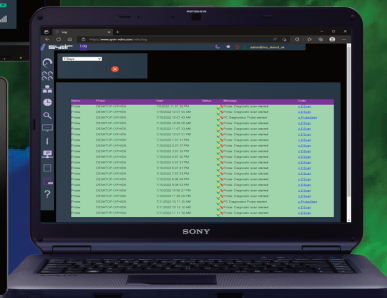

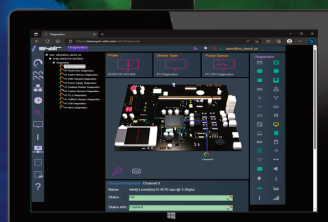

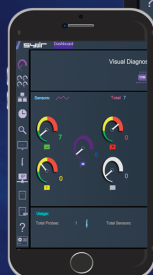

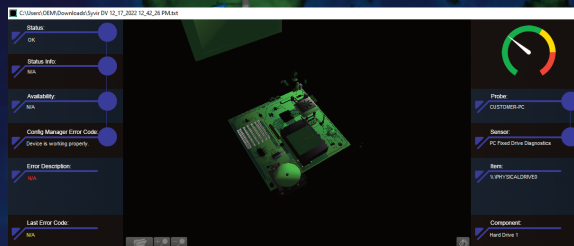

VDM

Syvir - Visual Diagnostics Monitor is the easy way to find out if any of your endpoints have hardware issues. SYVIR VDM works through a service probe on the target PC.

The probe on the machine runs automatically.
Data is transferred through HTTPS

Data is transferred from the endpoint probe to the SYVIR VDM cloud.

You can then view diagnostic data through a web browser or a Windows app.
