

Wragby Cloud PC (wC-PC)

The Wragby Cloud PC is our leading managed advisory service designed to provide organizations with the productivity, security, and collaboration benefits of Microsoft 365.

wC-PC

The Wragby Cloud PC is our leading managed advisory service designed to provide organizations with the productivity, security, and collaboration benefits of Microsoft 365.

Our services leverage a state-of-the-art suite of solutions and practices that speak to the hybrid challenges that organizations face. We are tasked with providing our clients with advanced security, enterprise messaging, intelligent communications, and collaboration tools to aid a seamless transitioning and adaptation into a hybrid environment.

Challenges in a Hybrid Work Environment

The workplace is still in transition

57%

of remote employees plan to shift to hybrid – while 51% of hybrid employees are considering a move to remote work permanently.¹

68%

of companies report experiencing a breach due to exploitation of an endpoint in 2021.²

67%

of IT professionals feel overwhelmed by trying to manage remote work.³

Our service is built on windows 365 which is a highly optimizable and scalable virtual machine providing end users with a rich Windows desktop experience. We provide tools and resources that ensure employees have access to a secure and productive desktop experience from anywhere. Many organizations are implementing Cloud PC to take complete control of its PC assets and data.

Windows 365 Cloud PC

Combine the power and security of the cloud with the versatility and simplicity of the PC. From contractors and interns to software developers and industrial designers, Windows 365 enables a variety of new scenarios for the new world of work.

Your Windows in The Cloud

Personalized Cloud
PCs

Simple, powerful, and
secure

Stream to any
device

Windows 365 provides the productivity, security, and collaboration benefits of Microsoft 365.

It is available in two editions:

- **Windows 365 Business** is made specifically for use in smaller companies (up to 300 seats) who want ready-to-use Cloud PCs with simple management options.
- **Windows 365 Enterprise** is for larger companies who want unlimited seats for creating Cloud PCs. It includes options to create custom Cloud PCs based on device images that you create, more management options, and full integration with Microsoft Endpoint Manager.

With the Windows 365 service, you can:

- Automatically provision on-demand Windows Enterprise Cloud PCs for your users.
- Manage your Cloud PCs like other devices in Microsoft Intune.
- Configure provisioning policies to create custom Cloud PC configurations.
- Use device groups, policies, and security baselines to customize your Cloud PC configurations to support different user needs.
- Pre-install apps in your custom Cloud PC image and push more apps to them through Microsoft Intune.

Use Case Scenario for Windows 365 Cloud PC

A common scenario could be long term remote or contract workers that may not require a corporate device. For example, you may have an external contractor working with you full-time over a period of several months. You could use Windows 365 to create a dedicated, cloud-based environment with access to a different set of applications, or access to specific parts of your network. You can enable this securely on their personal device, with whatever restrictions you choose, separate from their personal desktop.

How Does Wc-PC Managed Advisory Service Deliver Value to Customers?

Wragby Business Solutions will utilize the Microsoft Solutions Framework (MSF) to deliver this project. MSF organizes the solution approach into five distinct phases during the engagement lifecycle:

1. **Envision:**

Envisioning involves creating a business vision and defining the scope of work necessary to bring the vision to reality.

Table 1. Activities: Envisioning and Planning Phase

| Phase | Key Activities |
|--------------------------|--|
| Envisioning and planning | Kick Off Engagement |
| | Joint session with Relevant Stakeholders |
| | Confirm Timelines and Expectations |
| | Establish Team Resources and Roles |
| | Environment Assessment and Checks |

2. **Plan:**

Planning continues through the development of detailed system and application architectures, the user expectations for the solution, and a detailed project plan for the project.

Table 2. Activities: Planning and Design Phase

| Phase | Key Activities |
|---------------------|---|
| Planning and Design | Provide Conceptual Project High Level Solution Design |
| | Align on proposed solution, Scope, and Timeline |

3. **Enable:**

The Enable phase involves the setup, and onboarding of Windows 365 in alignment with set success criteria.

Table 3. Activities: Enable Phase

| Phase | Key Activities |
|----------------|---|
| Solution Setup | Execute remediation activities (if any) to be able to deploy Windows 365 in the customer environment. |
| | Setup Windows 365 Cloud PC provisioning and management for a selected group of users focusing on the selected hybrid work user scenarios. |

4. **Grow:**

This phase provides operational guidance and an executive summary of results identified during the engagement with key business decision makers.

Table 4. Activities: Grow phase

| Phase | Key Activities |
|----------------------|--|
| Operational guidance | Windows 365 Operations Overview presentation. |
| | Windows Autopatch Overview presentation. |
| | Present findings and recommended next steps to further develop the solution within the customer environment. |

5. **Deploy:**

Depending on the Scope, in Deploying Phase, the team deploys the core technology and site components, and stabilizes the deployment.

Table 5. Activities: Deploy Phase

| Phase | Key Activities |
|------------|--|
| Deployment | <ul style="list-style-type: none">• Assign licenses to users.• Create Azure network connection (optional).• Provide localized Windows experience (optional).• Add device images (optional).• Create a provisioning policy. |
