Our Solution

Risk & Compliance

- 1 IDENTIFICATION & DISCOVERY**
Understand your data landscape and identify sensitive data across your hybrid environment
- 2 PROTECTION & PREVENTION**
Apply flexible protection actions like encryption, access restrictions, visual markings and help prevent accidental oversharing of sensitive information
- 3 GOVERNANCE**
Manage high value items that are needed for the business, legal or regulatory requirements and keep what is needed and delete what is not needed
- 4 MONITOR**
Get a holistic view of Sensitive Information, current compliance score, and identify the improvement actions that can be performed to increase the overall score of the organization

Unified Data Governance

- 1 IDENTIFICATION & DISCOVERY**
Maximize the business value of data management for your data consumer, know the origin of data and discover data easily
- 2 PROTECTION & PREVENTION**
Provision access to data through an intuitive authoring experience to prevent unauthorized access and share data without having to make duplications
- 3 GOVERNANCE**
Get the unified data governance experience to help manage and govern on-premises, multicloud, and software as a service (SaaS) data for effective Data Governance
- 4 MONITOR**
Gain a comprehensive understanding of the data management activities in the data estate, learn about metrics and insights regarding the data estate

WHO WE ARE

John Keells IT is a security consulting services provider for enterprises. We endeavor to bring distinctive security consulting to market with best of breed security tools/services from Microsoft and partner eco systems to deliver the best in terms of service levels. We are best poised to achieve this through our simplified focus and in delivering to our client's security needs, through strong methodologies and best practices. This has enabled us to address our client's business needs and provide significant value addition by providing security consulting across the industries and technologies, with an "end-to-end" value proposition.

Do you have a strategy for Protecting and Governing Sensitive and Business critical data?
