# Tableau to Power BI Accelerator

Our Tableau Metadata Analyzer delivers personalized reports containing workbook categorization based on complexity, users, the total number of sheets and dashboards, primarily used dashboards, and data sources.

It also compares the license costs between Tableau and Power BI for the required number of users and provides comprehensive ROI details.

# Tableau to Power BI Accelerator

The screenshot displays the Tableau Impact Analyzer interface. The main window shows a report titled 'TABLEAU Metadata Analysis' with a table of contents:

- 1. Introduction 2
- Objective 2
- 2. Tableau Workbook Overview 3
- 3. Conclusion 4
- 4. Appendix 5
- Workbook Complexity Details 5
- Report Level Details 7
- Datasource Details 9

Below the report is a 'Finish' button. To the right, a separate window titled 'ROI CALCULATIONS' contains a table for comparing Tableau and Power BI license costs.

	Tableau License Type			Power BI License Type	
	Tableau Creator	Tableau Explorer	Tableau Viewer	Power BI Pro	Power BI Premium Per User
Number Of Users	<input type="text"/>	<input type="text"/>	<input type="text"/>		
License Cost-Per User/Per Month	\$70.00	\$42.00	\$15.00	\$9.99	\$20
Monthly Cost					
Annualized Cost					
Total Monthly Costs					
Total Annual Costs					
Annualized Savings					

At the bottom of the ROI CALCULATIONS window are buttons for 'CALCULATE', 'CLEAR', and 'FINISH'.

Migrate your Tableau reports to Power BI by leveraging the Tableau Metadata Accelerator, which can extract all the metadata information, such as data lineages, flows, and measures using REST APIs.

- ✓ Semi-automated SQL Conversion based on the data source mapping
- ✓ Power BI component or function or visual level comparison with Tableau

- ✓ Improves the migration analysis efficiency by >40-50%

---

- ✓ Excel reports with all the details including SQL Queries, formulas, Field names, and data source dependencies

---

- ✓ Allows to calibrate and capture the complexity details involved in workbooks, along with migration readiness flag

---

- ✓ Consolidates the type of data sources with workbook names

---

- ✓ Usage metrics of the existing list of Tableau dashboards

---

- ✓ Return on Investment - Power BI Vs Tableau (Based on the no. of reports & Users)

---

## Highlights – Tableau to Power BI Accelerator
