

Nonprofit Security Maturity Assessment

Protect your donor and volunteer data against increasing cyberattacks

HOW IT WORKS

BDO Digital will create a Roadmap that will increase your security score focused on your security and identity models. Our goal is to review your security risk posture and improve your overall compliance and security maturity.

At the end of this engagement, your organization will be able to manage risk and reduce IT spend all while improving overall operational efficiencies.

TIMELINE

STEP 1 - Workshops: Discovery session to level-set on security, identity, connectivity, security operations and identify gaps and opportunities

STEP 2 - Environment Scan : Scan security landscape to identify vulnerabilities and validate consistencies

STEP 3 - Analysis : Evaluate the workstations, servers, beneficiary and constituent data centers, donor and volunteer networks, and identity flow to improve your security score

STEP 4 - Recommendations : Present Roadmap findings to team, along with proposed initiatives and actionable first steps

RESULTS:

- ▶ Protection strategy for IT Assets
- ▶ Visibility on user, device and cloud usage
- ▶ Control access and consumption
- ▶ Identity model
- ▶ Score Card
- ▶ Roadmap to achieve best practice model
