WHAT WE OFFER

FortiGate Next-Generation Firewall delivers complete content and network protection.

GBM and Fortinet FortiGate firewall technology delivers complete content and network protection by combining stateful inspection with a comprehensive suite of powerful security features. Application control, antivirus, IPS, Web filtering and VPN along with advanced features such as an extreme threat database, vulnerability management and flow-based inspection work in concert to identify and mitigate the latest complex security threats. The security-hardened FortiOS operating system is purpose-built for inspection and identification of malware.

FortiGate delivers:

- End-to-end security across the full attack cycle

- Top-rated security validated by third-party testing

- Tight integration and multitenancy with Azure

- Centralized management across physical, virtual, and cloud deployments

- Automation templates for rapid deployment

See what customers are saying:

"Using Automation Anywhere we were able to digitize our import/export documentation and integration with customs within a short span, improving the productivity and reducing errors in data entry."
