

The Unstructured Documentation & Data Platform

AI powered and intelligent answer to unlock the value unstructured enterprise data

March 2023

80% of corporate data is unstructured & is growing 60% per year (Gartner)

Only 18% of corporations have transformed their unstructured data into valuable insights, which has typically led to a revenue growth in excess of 60% (Forrester). The challenge is how to achieve this effectively and efficiently.

Primary challenges

Legacy unstructured data along with newly created data can present a significant risk to growth, operations, security & compliance. Just relocating it to the cloud fails to address the risk & to release its value

Ideal solution

To utilize AI to migrate, clean & transform unstructured data to address security & release its value to support enterprise growth. By integrating AI into cloud transformation benefit can be realized in one step

Desired outcomes

While transforming into the cloud, the risk of unstructured data can be met for corporate security & compliance. Efficiently release legacy enterprise value to form the basis of growth now and into the future

The Unstructured Data Platform

Expede brings your entire unstructured documentation and data together in a single Azure-native cloud platform. From migration to extraction, transformation and analysis with synchronized data integrations.

A woman with long blonde hair, wearing a blue long-sleeved top, is sitting at a wooden table in a modern office. She is looking at a laptop. On the table are several items: a purple mug, a green mug, a blue pen, and a notebook. The background shows a glass-walled office space with other people and furniture.

AI Intelligent Migration

Efficient migrator that requires no data preparation. With data capture, deduplication & audit.

Data Extraction & Processing

Automated & cost-effective extraction of document contents with AI enhanced recovery of complex content

Search, Analysis & Data Connection

With tools for searching, compiling & analytics. Integrate into other systems with data connections

Expede, Unstructured Data Platform, and Microsoft Azure

95% of corporations use Azure, which provides the highest security combined with unique technology to deliver current and future enterprise growth. Expede is proud to be part of this technology ecosystem and provides through Microsoft the ability for corporations to release the value of their unstructured data to realize their goals.

Elastic Database

Expede is build on Azure dedicated hyperscale database which provides only what is required now with the ability to scale to meet the future

Consumption Based

Expede is provided on a consumption basis which adapts as business requirements change. This provides direct correlation between value & cost.

Enterprise Connections

Through Data Factory, Expede seamlessly integrates with all enterprise systems to meet current needs, while aligning with Big Data initiatives

Customer success: Unlocked legacy asset data for maintenance & site upgrade

Following the acquisition of an aging asset with the view to obtain approval to extend the site operating life and to add new infrastructure. The required site information was hidden & replicated across old folders. Expedite migrated to Azure, deduplicated & transformed the data within days which allowed the client to obtain all approvals.

▶ AI Migration

Old unstructured asset information which was duplicated & spread across network locations was automatically uploaded, cleaned & deduplicated

▶ Automated Processing

The contents of the unstructured data was automatically extracted with complex information from charts, diagrams, CAD & photos.

▶ Asset Future Management

With the data unlocked & in Azure it enabled to client to better develop its long-term asset management & expansion to include digital twin development
