

Organizations that are combining organizations are eager to seek the benefits of their business transaction while faced with a technical complexity to achieve their desired goals.

What We Offer

Agile IT provides implementation, planning, deployment, and migrations for organizations that combine various systems which include Microsoft 365.

- ▶ Tenant to Tenant Migration
- ▶ Email Migration
- ▶ File Migration
- ▶ Security & Compliance
- ▶ Mobile and Desktop

It all starts with **IDENTITY**

Identity is at the heart of all M&A projects which often includes existing Microsoft 365 tenants, local Active Directories, and other SaaS applications

What We'll Do

Agile IT provides implementation, planning, deployment, and migrations for organizations that are combining various systems which include Microsoft 365.

Our Process

1 Identity & Tenant Transition

Identify all sources of identity and create a plan for rationalization, consolidation, licensing transition, and migration execution

2 Data Migration and Access

Define and execute a migration plan that focuses on the key data to move aligned with your identities

3 Security Enablement

Define, configure, and provide guidance on leveraging Microsoft 365 and Azure to set a baseline or improve the security posture

Microsoft Licensing Preparation

Understanding your existing licensing and creating a plan during the transition is a key activity Agile IT focuses on during all M&A projects. Regardless if Agile IT is or will be your licensing partner.

- ✓ Vendor consolidation
- ✓ Reduce risk of over or under licensing
- ✓ Understanding the available options with customer selected licensing

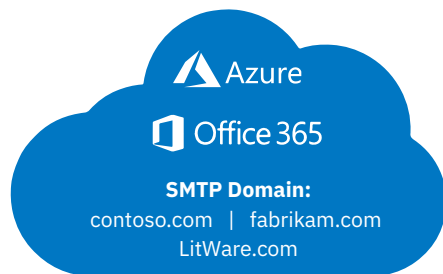

Beyond Microsoft Cloud Services

Customers often have other IT services that are traditional on-premise infrastructure, other cloud providers, and SaaS applications that must be incorporated into the initial plan and roadmap. Agile IT provides these services to:

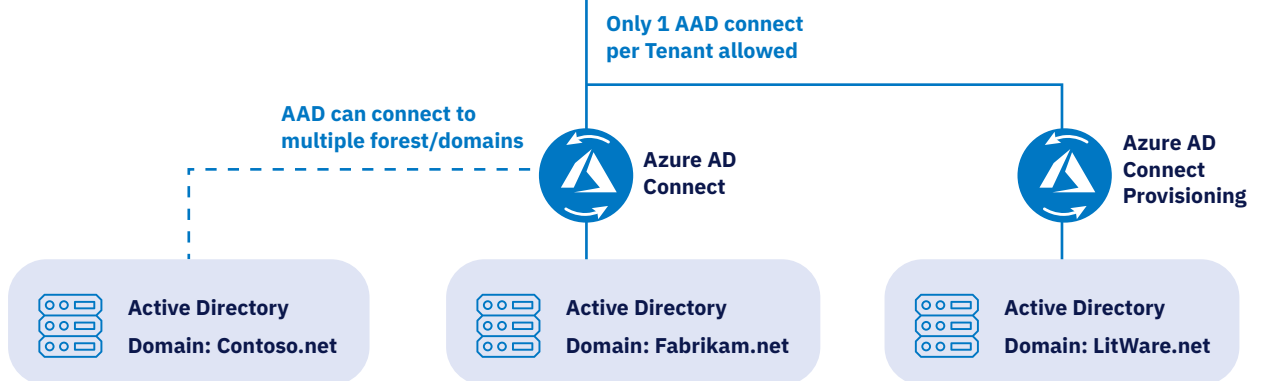

- Reduce user and IT complexity
- Reduce vendors, costs, and contracts
- Reduce security risks
- Improve compliance requirements
