apptimized®

Workspace

Scalable, robust and secure discovery and packaging toolkit in the cloud

Easy to use tool from application packaging specialists to application packaging specialists, regardless of software packaging skills

Working in the packaging industry usually involves working on daily tasks of the same type that takes up too much professional time. Practically, this means that instead of solving complex problems, you have to do simple but necessary actions.

Workspace was designed specifically to enable the automatization of all routine actions of the packaging specialist. Thus, work becomes more comfortable, and working time will be distributed much more productive.

The system supports the most common and latest packaging formats: App-V, MSI, MSIX. Apptimized is constantly working to improve the product.

BENEFITS TO YOUR ORGANIZATION

Packaging toolset

A tool that performs all engine actions allows you to spend time more efficiently on solving really important and complex tasks.

Best experience based

The tool, which is the results of a collaboration between packagers and developers.

Modern formats supported

Generate several package formats in the process of work or change the format of an already finished package.

Key Product Features

Any package any time
The ability to get multiple application formats during the packaging of the first version and after. So, the final generated package can be repacked into a new format with the ability to make adjustments if necessary. Thus, even without additional skills in the subject of packaging, you can issue more.

Create and test in one place
After the package has been generated, we provide a clean virtual machine with the different OSs on which it will be possible to check how it works. Thus, you can be sure that the shipped package actually performs all the declared functionality.

Custom settings per project
If it is necessary to work with several projects at the same time it is possible to save templates for each of them. In the future, this will allow you to save time on setting up all the configurations and immediately begin the process of packaging the application.

Edit your package
All working information is accessible for editing, so you can edit it while working in order to properly tune the configuration.

Modern workspace
Apptimized Workspace is continuously improved and new features and technologies are supported within short term.

Best practices for packaging Workspace
The tool, which is the results of a collaboration between packagers and developers, takes into account not only the basic features of software packaging but also covers the cases that are mostly needed in the workplace.
