Implement Power BI	Prepare and model data for quick analysis and business insights	Integrate Power BI into commonly-used business tools	Customize Power BI reports and dashboards with critical metrics & KPIs
Drivers	<ul style="list-style-type: none"> <li>Identify gaps in the existing system</li> <li>Need and urgency for an analytics platform</li> <li>Other potential opportunities</li> </ul>	<ul style="list-style-type: none"> <li>Implement Power BI Desktop, Power BI Mobile, or cloud service</li> <li>Empower self-service BI</li> <li>Keep your business up and running</li> </ul>	<ul style="list-style-type: none"> <li>Get instant business insights</li> <li>Insightful and intuitive reports</li> <li>Visually immersive experience with interactive dashboards</li> </ul>	<ul style="list-style-type: none"> <li>Integrate Power BI into everyday business apps</li> <li>Swift data flow between systems</li> <li>Visualize insights from all the apps in one place</li> </ul>	<ul style="list-style-type: none"> <li>Customize with business-specific metrics</li> <li>Get multi-dimensional view of all the data</li> <li>Be inline with your business</li> </ul>
Technologies	Power BI	Power Apps		Power Automate	
Results	Create interactive visualizations from multiple data sources Discover hidden insights and share across organization in minutes Back up business decisions with verifiable data and achieve powerful results				

We built  
accelerators by  
leveraging these  
levers

## Levers

---

- ✓ Inputs from Industry Experts
- ✓ Research Data
- ✓ Domain Experience
- ✓ Technical Expertise

## Accelerators

---

- Technology Migration Accelerator
- SSRS to Power BI

# Value Proposition

## Insights to actions

Transform analytical insights (accelerators) into real-time reports and take action on the data

## User-driven innovation

Enriching customer experience by taking feedback from end users and through different channels

## AI-infused Accelerators

Spot data patterns and track trends to drive strategic actions on the move with inbuilt AI/ML capabilities

## Improve efficiency and Maximize ROI

Reduction in development effort (50 – 60%) with instant reports, resulting in improved efficiency and ROI

**Thank You!**
