

## What is Res.Q | MI ?

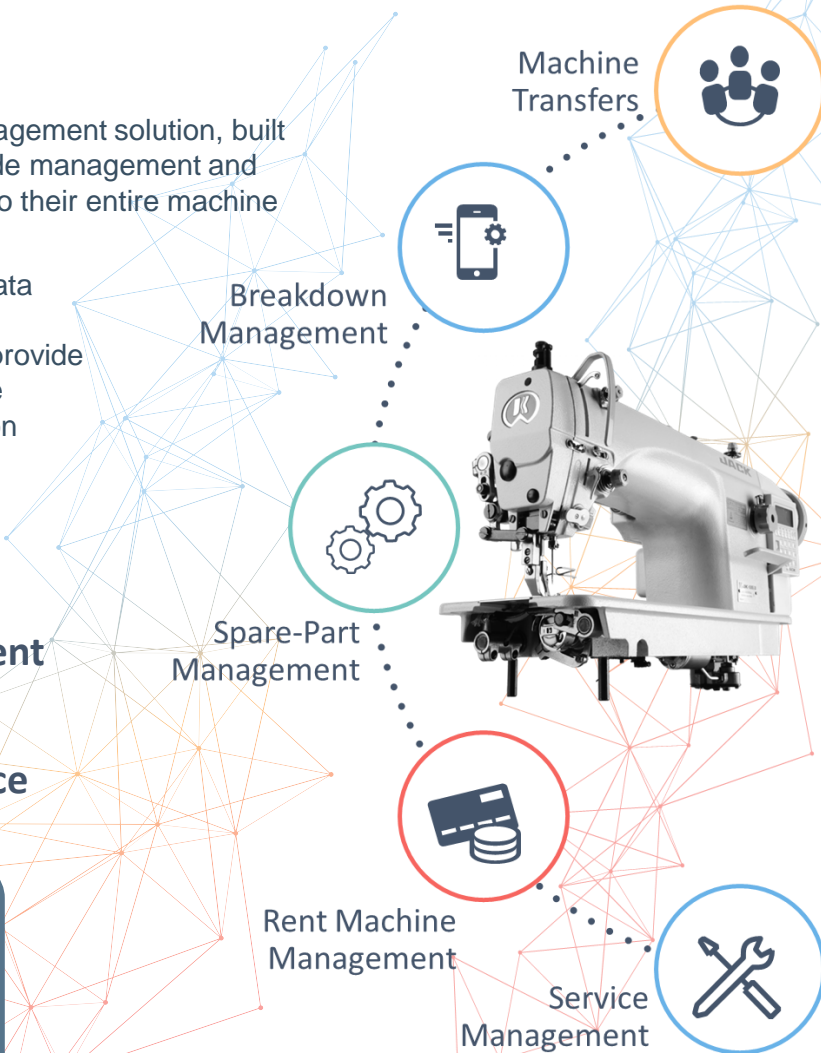

Res.Q | MI is a cloud based machine management solution, built leveraging the technology of NFC to provide management and maintenance teams with real-time insight to their entire machine management process.

Res.Q | MI also helps make sense of the data captured by having it run through Res.Q's Integrated real-time analytical platform to provide decision makers with a range of interactive dashboards for instant, data-driven decision making.

- Paperless Machine Management
- Needle Management
- Digitized KPI Measurement
- Predictive Maintenance

## Mark Machine Breakdowns with Just a touch of a button

Mark any broken-down machine with the Res.Q mobile app itself! This sends an instant notification to the responsible mechanic, alerting him/her on the exact machine and its issue.
