SYVIR®

SYVIR IM

Checks for Inventory changes.

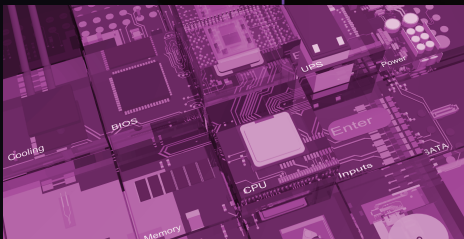

SYVIR IM enables system administrators to perform automatic inventory checks on endpoints.

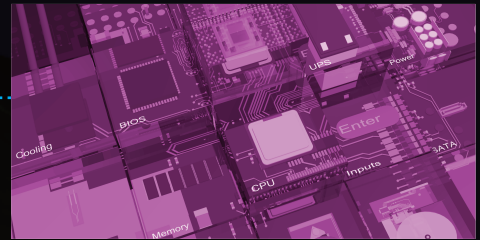

Check your clients Windows PCs, Servers, VMware, Hyper-V for inventory changes.

Cloud based, view inventory information through a web browser. Produces alerts if changes have been made.

Manage endpoints from anywhere in the world.

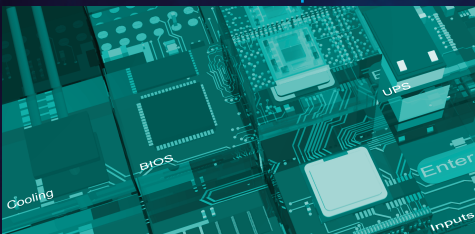

Syvir Inventory Monitor is the easy way to find out if any of your clients endpoints have inventory changes. SYVIR IM works as a service on the target PC, Server or virtual machine.

Data is transferred from the probe to the SYVIR IM cloud.

You can then view inventory data through a web browser.
