

Builder.ai[®]

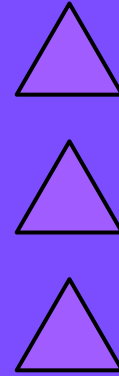

About us

www.builder.ai

Our Vision

An app in every business and in the hands of every entrepreneur

Builder.ai is a AI powered platform building software for

The small business owner

The enterprise decision maker

The entrepreneur

Usually, software projects have a 78% failure rate...

From entrepreneurs to enterprises – we're all spending more on custom software than ever before. Every business is now a software business.

\$530 billion freelance tech work in 2017 ¹
with **78%** failed projects **13%** over budget ²

¹ "Can the blockchain really disrupt the middleman freelance platform"

² "The Standish Group Report Chaos - Project Smart."

**...instead, we offer a
risk-free,
assembly-line
approach**

- AI reduces risk & increases efficiency – our failure rate is close to 0%
- Projects are fully managed – with fixed prices and accurate deadlines
- No slippage – with 95% of projects delivered on time
- Our whole process is transparent – and covers the entire life cycle of your idea
- Your code is always up to date with our subscription service
- And we can save you up to 20% on your monthly cloud bills too

**Build, run & scale
almost anything you
can imagine on our AI
powered platform.**

Builder STUDIO

Turn ideas into tailor-made software

Our reusable features stack like Lego. They're customised for your idea on our AI powered assembly line by a network of trusted designers and developers.

Builder STUDIO ONE™

You get more than an app with us

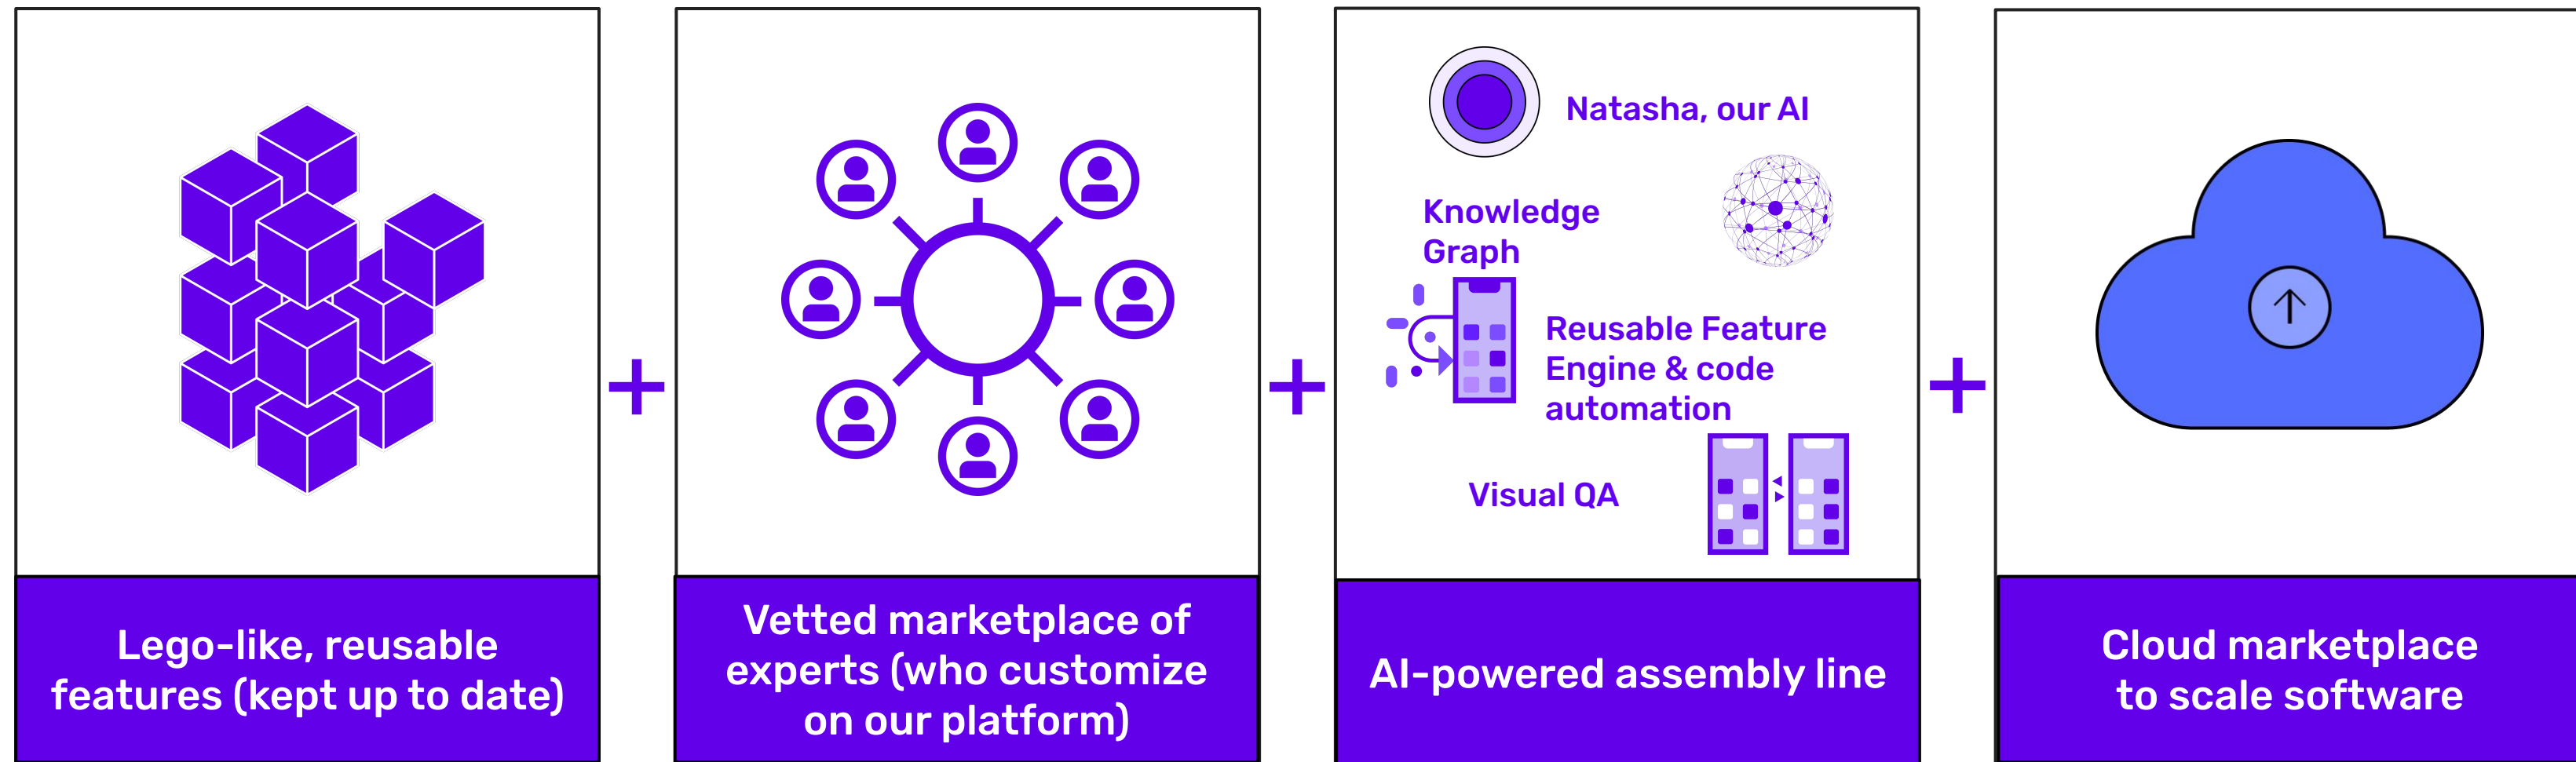

Keep your app in peak performance from day 1, and monitor your build so it's exactly how you want it.

Builder CLOUD™

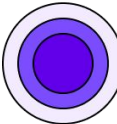

Unlimited scale for your idea

Save up to 20% on your monthly cloud bills. You get world-class analytics and DevOps automation too. All the services your app needs, on a single bill.

Our AI powered assembly line manufactures your software...

Using our AI, Natasha, as your product manager...

Hey, I'm an app-building AI called **Natasha**. Tell me what problem your app solves and I'll help.

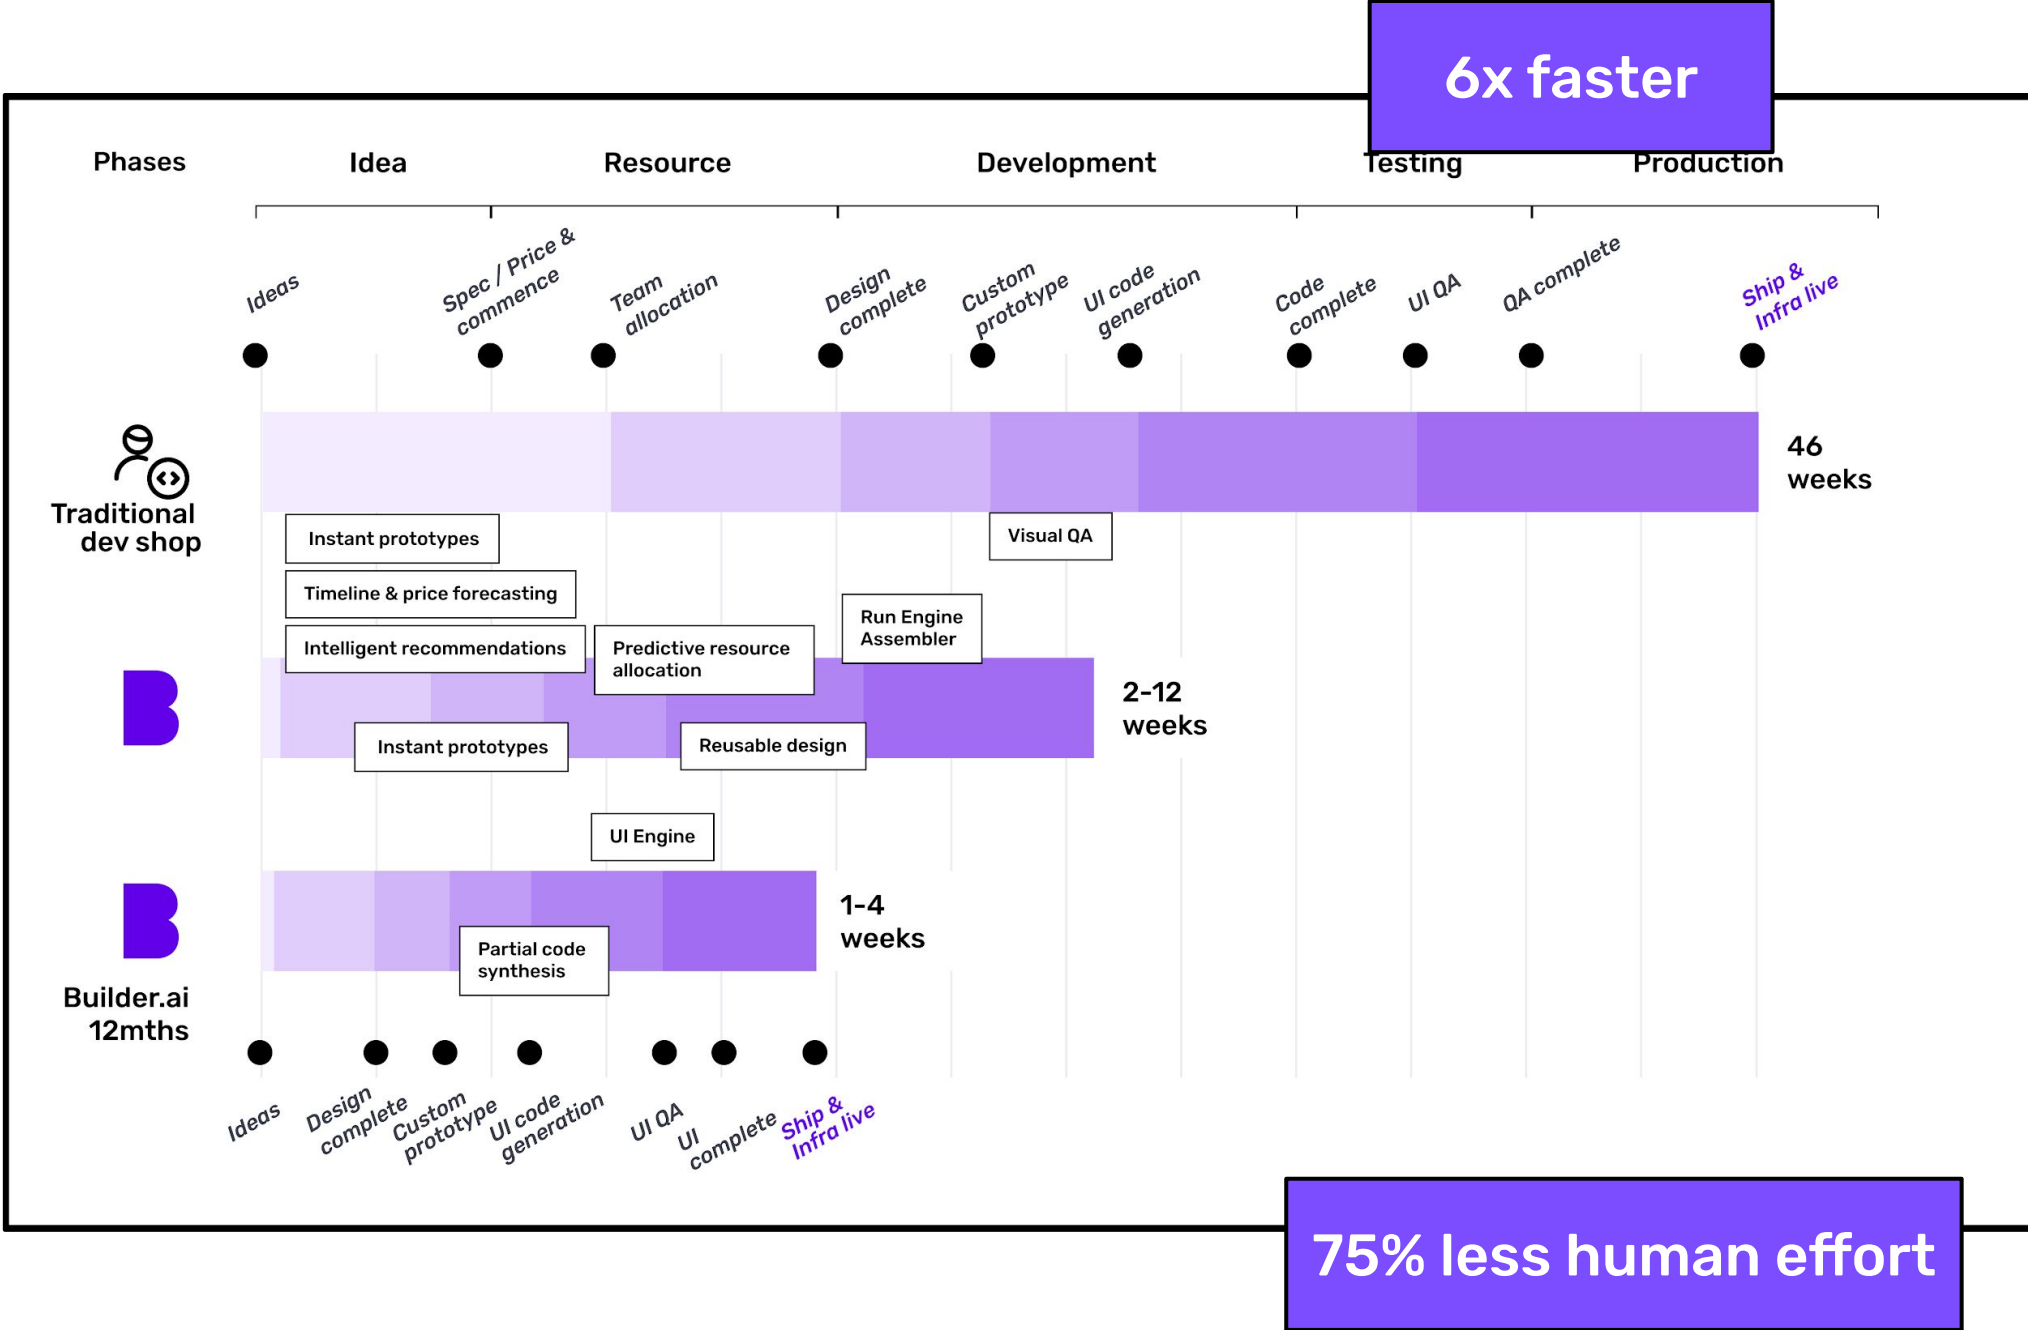

I want to build: **Uber for babysitters with ratings**

Press Enter to submit

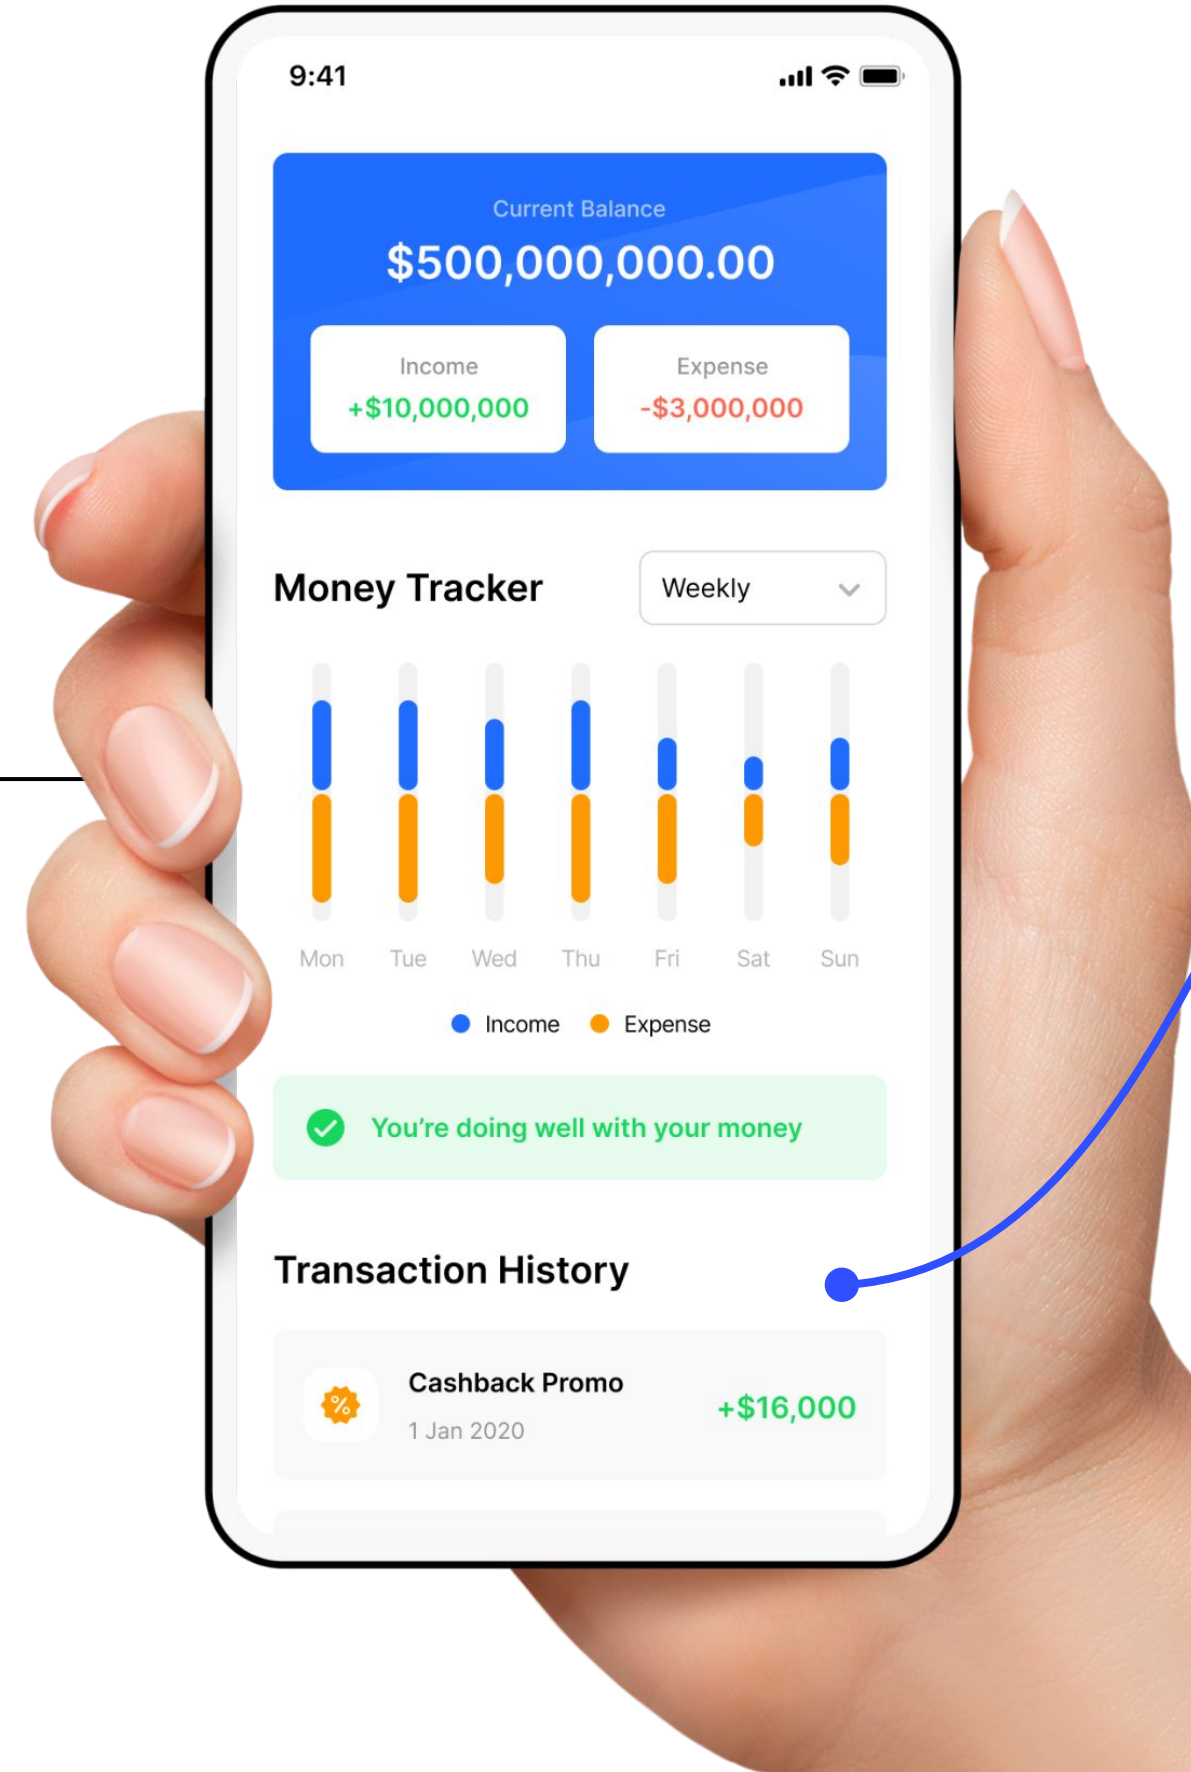

SJ

The screenshot shows a web interface for building an app. At the top, there are navigation links: "1. Choose templates", "2. Refine features", "3. Plan delivery", "Become a partner", "Talk to our experts", "USD", and "Sign in". A search bar contains the text "I want to build uber for babysitters". Below the search bar, a notification bubble says "Thanks, I've found these for you, Are they useful?" with "Yes" and "No" buttons. The search results show "2 results for I want to build uber for babysitters". Three app templates are displayed: "Uber", "Citymapper", and "Tinder". Each template includes a logo, a "BUILD AN APP LIKE" label, a plus icon, a screenshot of the app interface, and a brief description of the app's features.

Reducing time & effort to build software, from 40 weeks to 12 with guaranteed pricing
