Microsoft

AVD IN A BOX PROGRAM (2 WEEKS)

Your 2-Step AVD Success Journey

Our team of certified specialists will guide you through a 2-week engagement to accelerate your AVD journey on Microsoft Azure

WEEK-1

- Study current system environment/configuration across different verticals/dept.
- Assess current network infra in place on cloud
- Gather user's requirement and various applications they would need on AVD
- Understanding scale up and scale down requirement in order to configure auto scale in optimized way
- Suggest best customized configuration available on Azure
- Freezing the requirement details

WEEK-2

- Requesting client for required access and authorization
- Create all prerequisite network objects i.e., ADDS, RG, FSLogix
- Provision host VM and install all applications required
- Configure auto scaling for real time performance optimization
- Assign AVDs to all required users
- Releasing communication to all the stakeholders of AVDs availability
- Take feedback and concerns from users and fix the issues
- Share User's manual for general login and fault issues

THANK YOU
