

The Statement of Work problem.

Most large projects (**90%**) and **over half** of small projects fail, usually because **the scope of work is not well defined.**

Make projects more successful with Deployed.

Deployed's Work Author solution is a powerful presignature® SoW writing solution for any type of service, **a collaborative all-in-one platform that guides authors to the optimum scope and Statement of Work framework.**

Don't let poorly defined work put your projects at risk. Work Author is stacked with features to make Statement of Work creation and collaboration seamless and intuitive, from start to finish.

What Deployed offers.

Deployed's Work Author platform is user-friendly, needs no training, and can be implemented in under 6 weeks with our pre-built best practice frameworks.

Guided Scoping®

Guide users to the best scope of work
Create standard ways of describing services

Dynamic Templates

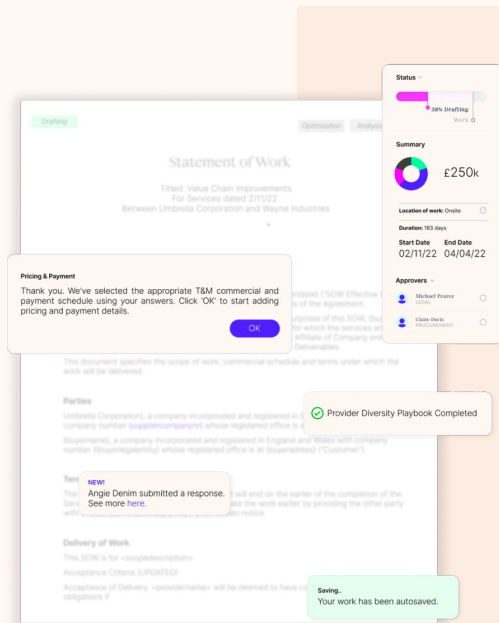

Easy-to-use digital templates
Replaces manual form filling

Automatic Pricing Tables

Embedded pricing modules that can be shared
Creates value through consistent commercial models

Playbooks

Pre-built question sets to address common business challenges, from IR35 to capitalisation and supplier diversity.
Configurable for your organisation's goals.

Work Author now comes with up front decisioning in our Work Assessor module, helping business users make better decisions faster, e.g. commercial models or worker classification.

Measurable benefits from using Deployed.

10x the rate of project success, with **outcomes based scope**

15% cost reductions with **automated commercial models**

80% Less time required from legal with **predetermined clause & trigger rules**

4x Improvement in Time-to-Sign

6+ Weeks of **meaningful and instant data**
