Telemetry Dashboard

Example: standard features in use

The screenshot displays the Dynamics 365 Business Central Usage report for the period 01/11/2022. The main content area is titled "Application areas (base application)" and includes a sub-section "Usage by Application areas" which is highlighted with a blue border. This section contains a treemap chart showing usage for Sales, Inventory, Finance, Purchasing, and other areas. To the right of the treemap is a table titled "Page views and reports run" which lists various application areas and their corresponding counts. On the far right, there are two filter panels: "Filters on this page" and "Filters on all pages".
