

Discover Sensitive Data Assessment

Enhance your zero-trust security posture by discovering your sensitive data.

Identify and assess the security posture, location, and movement patterns of sensitive data in your organization to better understand required solutions.

In this 2-3 week assessment, KIZAN will assess your M365 SharePoint, OneDrive, Teams, and Exchange environments to provide insights on not only where sensitive data is stored but also risky sharing patterns throughout your organization. This assessment will provide the necessary knowledge to begin protecting your data landscape, faster.

Data classification is at the heart of regulatory compliance and Zero Trust, and the first step of effective data management is knowing it exists.

Discover Sensitive Data Assessment Deliverables:

- ▶ Microsoft Purview solution workshop and planning session
- ▶ Free on-boarding to the Cognni Information Intelligence platform
- ▶ M365 data classification taxonomy accelerator
- ▶ Completed sensitive data assessment
- ▶ M365 sensitive data findings review and next steps

Powered by Cognni | Exclusive Partnership

In this assessment, you'll learn how to:

- ▶ Identify sensitive data to prevent accidental or malicious data leakage
- ▶ Proactively comply with industry regulations and internal policies
- ▶ Minimize risk in the event of litigation or a security breach
- ▶ Enable full mobility of data without sacrificing security

Phase 1 - Data Lifecycle Management: Know Your Data

Understand your data landscape and identify important data across your hybrid environment

KNOW YOUR DATA

PREVENT DATA LOSS

Detect risky behavior and prevent accidental oversharing of sensitive information

Apply flexible protection actions including encryption, access restrictions and visual markings

PROTECT YOUR DATA

GOVERN YOUR DATA

Automatically retain, delete, and store data and records in a compliant manner

Powered by an intelligent platform

Unified approach to automatic data classification, policy management, analytics and APIs
