FOR PEOPLE WHO HATE MANAGING PROJECTS, BUT LOVE TO COMPLETE THEM

WORKROOM®

Each project has its own Workroom® with all people, files and tasks. A Workroom® can be set up in just a few clicks, and work can begin straight away.

WORK IN PROGRESS

Comments can be easily and visually added to images, documents, videos, designs & animations. From a comment, a task can be created with just one click and then automatically transferred to the responsible people. This means that work almost organizes itself.

SPEED UP APPROVAL PROCESSES

The approval procedure is visible through different versions. New versions of files are displayed in the split-screen preview mode. You can easily and directly compare changes, letting you significantly streamline the change and approval process.

WORK ANYWHERE AND SHARE RESULTS

The files in a Workroom® can be automatically synchronized on any device. The team members can carry on working in their usual environment, and up-to-date versions are available to everyone involved. This means everyone is up to date - no matter where they are or what device they're using.

STAY ON TOP OF THINGS

Depending on priority level, information can be transferred automatically as smart notifications or can be displayed in the Workroom's® activity stream. This speeds up project communication and teamwork, ensuring everyone is kept well-informed at all times.
