OPTIMISE & DE-RISK

INDUSTRY PROBLEM & IMPACT

A shortcoming of the renewable energy sector is its ability to produce robust and credible financial plans based on project implementation of **wind**, **wave**, **tidal**, **offshore wind**, and **combined technologies**.

This has had the knock-on effect of slowing the sector due to the investor's inability to quantify or differentiate technical and financial risk...until now.

We have created a sound, equitable and independent financial planning software tool, which will bring confidence to, and de-risk, the sector.

✓ WIND

✓ WAVE

✓ TIDAL

THE SOLUTION

EXFIN SOFTWARE

End-to-End Renewable Energy Project Development & Management

- ✓ Exfin is the first complete renewable energy financial platform designed for teams. Collaborate in real time and gain actionable insights about your renewable energy project.
- ✓ Exfin provides an easy like-for-like comparison across devices, projects and locations with the bottom line being financial viability.
- ✓ Indicators such as Levelised Cost of Electricity (LCOE), Internal Rate of Return (IRR), Net Present Value (NPV), Payback and Cash flows are provided to answer these questions.

UNIQUE BENEFITS & FEATURES

TRANSPARENT KPI ANALYSIS

Dive deep into the financial metrics of your project. Support design and business decisions with robust, transparent KPI analysis

Analyse the outputs of your project

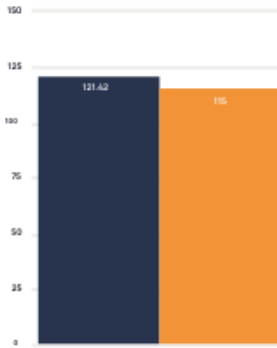

Determine cost reduction pathways

Maximise the use of your resource

Goal Seek

Original New

LCOE

Target Value - LCOE

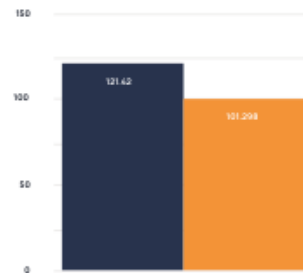

Capex Total

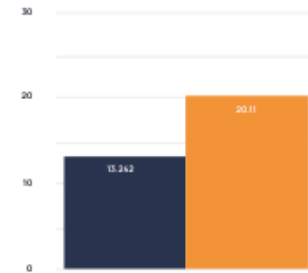

Change Parameter - Capex Total

Fine Tuning

Original New

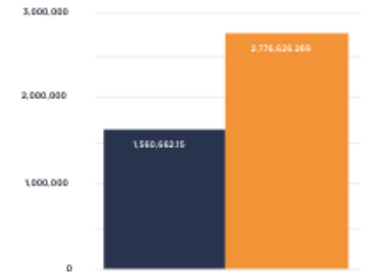

LCOE

IRR%

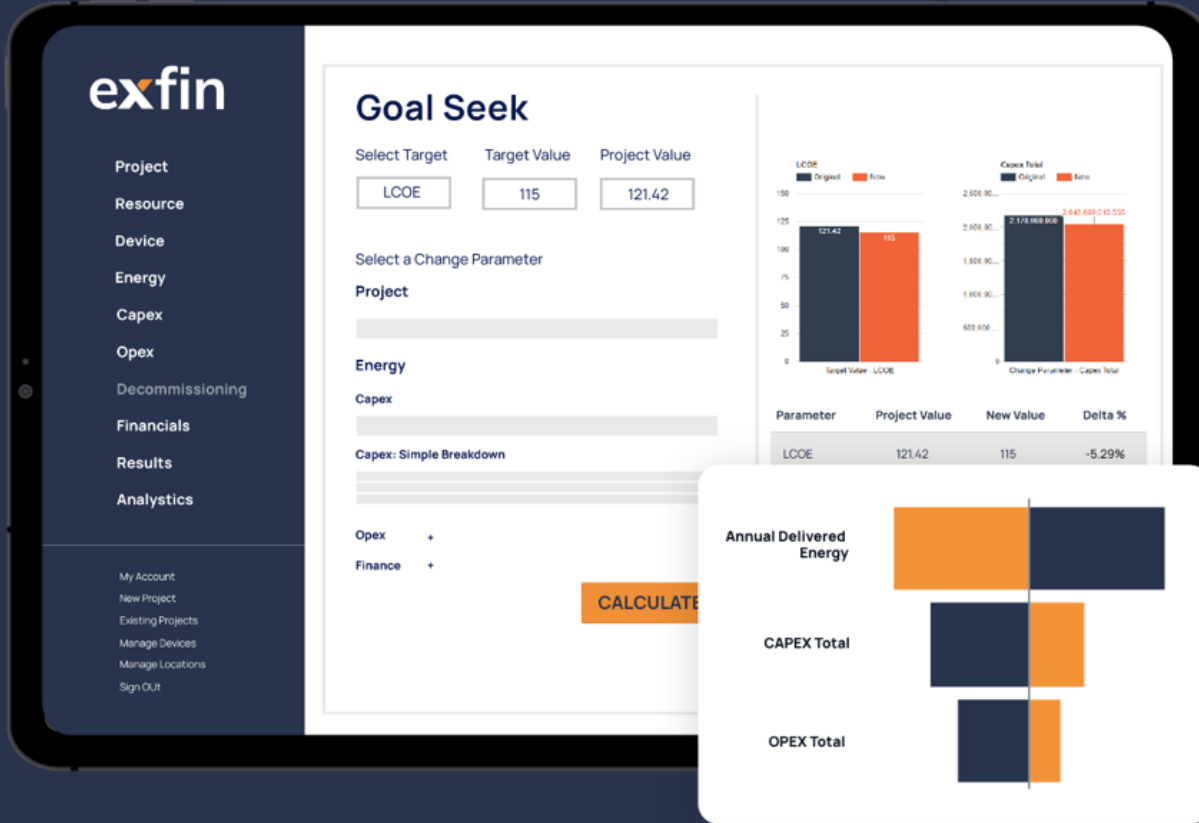

NPV

NPV/IME

CONDENSE WEEKS OF WORK INTO DAYS

- ✓ Prospect sites quickly
- ✓ Test multiple variations of your technical & financial parameters
- ✓ Compare and contrast unlimited scenarios instantaneously
- ✓ Remove internal & external project delays through a secure shared platform
- ✓ Utilise your resources better & book more work, develop more projects

Find the best projects with exfin

6 SIMPLE STEPS TO PROJECT SUCCESS

exfin will streamline your existing workflow, building efficiencies throughout and ultimately ensuring the success of the best projects.

Generate the project's cashflow in seconds.

Support design and business decisions with robust, transparent KPI analysis

Identify key cost drivers and create actionable insights

Determine cost reduction pathways

Maximise the use of your resource

Compare unlimited versions of your projects
