

Modern Work

Envisioning Series - Manufacturing

A three day Envisioning Workshop series
focussed on the Manufacturing industry

2023

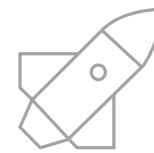

Exploring the art of the possible with Microsoft Dynamics 365 SCM

Microsoft Dynamics 365 Supply Chain Management strengthens your manufacturing business by connecting systems and data, allowing you to anticipate change, minimise disruptions, and reduce time to market

Primary challenges

Historically manufacturing solutions are implemented and configured over a long period of time in which new challenges and new requirements are introduced, leading to disconnected systems and processes

Ideal solution

One solution to cover all aspects of the manufacturing process with interconnected processes and real time data available to everyone from the factory floor to the boardroom

Desired outcomes

The ability to centrally manage product information, planning and sourcing, production and distribution, asset management, sales and service will lead to quicker and leaner manufacturing workflows and higher profits

3 Day Envisioning Workshops

Explore the art of the possible for your manufacturing business. Envision your desired state to be and highlight your current pains and challenges.

Workshop One

Discovery workshop. Understanding your current strategy, processes and IT landscape

Workshop Two

Envisioning workshop. Exploring your vision for your Manufacturing operation

Workshop Three

Action workshop. Presenting a roadmap of recommended actions to take to realise your vision.

Reply Group, Envisioning, and Microsoft Dynamics 365 SCM

As your Manufacturing business grows and evolves over time you have had to adapt to meet these changes. Software and hardware solutions are implemented at the time and most often results in variety of siloed disparate solutions lacking integration and hindering process automation. Explore modern manufacturing solutions with Reply and Microsoft

Reply

We combine our strategic and creative approach with today's cutting-edge technologies to start making things happen from day one.

Envision

Explore the art of the possible with our Envisioning workshops, driven by experienced Manufacturing consultants

Microsoft Dynamics 365 SCM

Manufacture a more resilient future by driving innovation, optimising operations, and deepening customer relationships.

Customer success: Sila Group

Sila is a fully-fledged Tier 1 automotive component manufacturer of shifting systems, with manufacturing operations in Italy, Poland, China, Brazil, Argentina and India and serving customers like FCA Group, Mercedes Benz, BMW, Volvo Trucks

► Challenge

Sila operated a variety of departmental systems and data harmonisation was a major issue leading to reporting inconsistencies and cumbersome processes

► Solution

Dynamics 365 manufacturing experience for OEMs/Tier 1 suppliers fully integrated into the automotive ecosystem with completely automated EDI.

► Whats next

Global rollouts of other companies in the group
