Technology

Tekmon's platform is a web and mobile application that consists of smart digital blocks specifically designed for the operations of frontline teams. Each block can be setup without a single line of code and can hold information, describe a process or apply a workflow. Depending on the blocks utilized and the content provided, companies can digitize across functions, including safety, quality, maintenance and operations within a few days.

Resource Building Blocks

Resource blocks are used to keep information of the physical world organized and structured.

Locations
Add your locations and relevant information.

Assets
Digitize all physical assets.

Parts
Track inventory of parts & consumables.

Companies
Customers, Partners & Vendors information.

Products
Lists and details for your producing goods.

Documents
Upload & organize your files with important metadata.

People
Employee & stakeholders' information.

IoT
Connect sensor data from physical objects.

Operations Building Blocks

Operations blocks are used to build digital processes for the frontline workforce.

Tasks
Assign tasks/work orders & monitor their progress.

Forms
Collect data through digital forms & mobile checklists.

Alerts
2-way SMS, Voice & Emails for mass notification.

Briefings & Trainings
Deliver staff briefings and micro-trainings remotely.

Requests
Enable internal/external parties to submit requests.

Projects
Organize operations into Projects for improved visibility.

Workflows

Workflow blocks are used to automate data flow between operations and systems.

Internal
Create triggers to streamline data flow between operations.

Integrations
Out of the box integration with ERP systems & BI tools.

ESG Reporting

Tekmon helps organizations establish a reliable process to collect ESG data efficiently. Determine what needs to be measured and when, allow your teams to collect information on the go, spot late submissions, fuel your reports automatically with the correct data, and more.

✓ Up & running within a week.

✓ 90% faster reporting.

✓ Multi-framework compliance.

Collect the data you need.
## Fast, Structured & Error-Free!

Say goodbye to lost or incomplete reports. No more manual entry forms.
No more wasted person-hours in generating reports.

1

Delegate data collection

Create your data collection schedule. The system informs your colleagues of the relevant deadlines and exact procedure to follow.

2

Collect ESG data

Your teams can use their desktop or mobile phone to complete and submit forms anytime and from anywhere.

3

Get results immediately

Export custom reports with a press of a button. Track and analyze ESG data and KPIs across your organization.
