

ONE STOP DENTAL SOLUTION

Dental Healthcare Management Solution

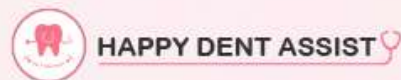

Happy Dent Assist - Intro

HAPPY DENT ASSIST

About

Envisage Software, a startup with its founders having two decades of experience in IT & Healthcare industry brings to you "Happy Dent Assist", a dental healthcare management system.

Over many years, dentists have spent their precious time in co-ordinating with dental labs, material suppliers & logistics partners in getting their products/services delivered on time. Lack of standardized process, communication gaps & support tools has led to this productivity loss.

Envisage software, after years of its extensive study with various stakeholders in the industry, including the highly experienced dentist, lab professionals & technocrat, came up with India's first fully automated & integrated Dental Health Care Management App which gives you the seamless experience of paperless clinic / lab management all bundled in one power pack - "Happy Dent Assist"
