

4-WEEK AZURE COST OPTIMIZATION

Gold Datacenter
Gold Data Analytics
Gold Cloud Platform
Gold DevOps
Gold Application Development

DEVELOP CLOUD COST STRATEGY

WHY YOU NEED OUR COST OPTIMIZATION OFFERING

- Get actionable steps to decrease costs immediately up to 20%
- Define and build a proactive cost management strategy
- Understand dependencies and have a precise cost classification

5 STEPS TO MAKE ASSESSMENT SUCCESSFUL

- 1** Lead an Intro Session and explain to the client Azure cloud cost optimization strategies and tactics to be used in the Assessment
- 2** Review existing architecture (tech deep-dive) and processes, analyze billing and costs
- 3** Define cost optimization strategy with short- and long-term optimization activities
- 4** Make trade-off analysis and build a high-level roadmap
- 5** Deliver Cost-Optimization Report with recommendations and define the next steps

ABOUT THE ASSESSMENT

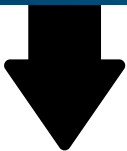

If you feel like your organization overspends on cloud resources, this assessment will bring an understanding of your costs, possible cloud cost optimization strategies, and tactics and will provide exact short- and long-term steps to decrease your bill.

Apart from recommendations on how to decrease costs immediately, our experts will define and build a proactive cost management strategy, which will help predict your future expenses, understand dependencies, and have a precise cost classification.

With a cost management strategy, you will be able to continuously review your costs, notice trends on how these costs change in your financial planning, and precisely understand your future expenses for each phase of a project.

IN 4 WEEKS, YOU WILL GAIN

- Detailed report with cost-management process gaps, missing cloud provider best practices, and non-direct costs
- Actionable and prioritized recommendations to optimize cloud costs
- Cost management proposals with cost classification & tracking and future cost modeling approach
