

Azure Platform Landing Zones

ABOUT US

CompuNet is a leading U.S. information technology partner specializing in strategic consulting, architecture, solution design, and implementation services specifically tailored to solve business problems. With a best-in-class engineering team and approach, CompuNet focuses on building lasting relationships that prioritize customer satisfaction over sales through every step of the journey.

WHAT IS AN AZURE LANDING ZONE?

Azure Landing Zones are a framework for building the core infrastructure of an Azure environment through code, resulting in resource consistency, reliable and repeatable deployments, alignment with industry best practices, improved security and compliance, and reduced time-to-value.

Properly preparing the foundation of an Azure environment prior to migration—or realigning an existing Azure footprint to fit into the Landing Zone framework—is crucial to achieving desired business outcomes.

Kickstart your Azure environment with a proven foundation and guardrails to reduce risk, build confidence, and drive innovation

ACCELERATE CLOUD ADOPTION

- Start with trusted patterns and skip trial & error
- Employ cloud elasticity to start small, scale later
- Establish guardrails to stabilize and streamline

INFRASTRUCTURE AS CODE

- Reduce effort with declarative configurations
- Ensure consistency and reduce human error
- Leverage version control and drift detection

KEY DELIVERABLES

- Ready-to-use Azure infrastructure
- Comprehensive hand-off documentation
- Recommendations for further optimization
