Welcome to Microsoft Azure training and certifications

Our approach to learning is to develop an inclusive environment for every stage in an individual's career.

How to use this deck

The following resources will prepare you for the learning experience.

Training journey

Recommended tracks to help you identify where to start your training and where to go based on your role or projects..

Certification portfolio

Available certifications and associated exams in portfolio.

Certification overview

Identify the right candidate profile with the recommended skills, knowledge, and experience.

Certification journey

Recommended steps to earn a certification, including preparation resources and opportunities for continue learning.

Certification learning path

Recommended training content to prepare for certification exams, including self-paced training and Microsoft Official Courseware (MOC) delivered by Learning Partners.

Azure training journey for IT pros

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals

Grow in role

 Start here

Implement, manage, and monitor cloud solutions

 Azure Administrator Associate

Implement and manage secure cloud solutions

 Azure Security Engineer Associate

Design and implement end-to-end cloud solutions

 Azure Solutions Architect Expert

Implement and manage networking solutions

 Azure Network Engineer Associate

Manage SAP solutions on Azure

 Azure for SAP Workloads Specialty

Deliver continuous value, integrating people, processes, and technologies

 DevOps Engineer Expert

Bring cloud agility on-premises

 Azure Stack Hub Operator Associate

Deliver virtual desktop experiences and remote apps on Azure

 Azure Virtual Desktop Specialty

Continue to grow with additional training

Migrate apps and infrastructure to the cloud

Manage Windows Server and hybrid cloud solutions

Manage Linux on Azure

Azure training journey for developers

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals

New to data solutions on Azure

 Azure Data Fundamentals

New to AI or new to AI on Azure

 Azure AI Fundamentals

Grow in role

 **Start here**

Design, build, test, and maintain cloud apps

 Azure Developer Associate

Deliver continuous value integrating people, processes, and technologies

 DevOps Engineer Expert

Develop cloud and edge IoT solutions

 Azure IoT Developer Specialty

Build, manage, and deploy AI solutions

 Azure AI Engineer Associate

Design and implement end-to-end cloud solutions

 Azure Solutions Architect Expert

Continue to grow with additional training

Migrate data to the cloud

Azure training journey for data & AI pros

Master the basics

New to the cloud or new to Azure

 Azure Fundamentals

New to data solutions on Azure

 Azure Data Fundamentals

New to AI or new to AI on Azure

 Azure AI Fundamentals

Grow in role

Start here

Manage relational cloud and hybrid databases

 Azure Database Administrator Associate

Get structured and unstructured data ready for analytics

 Azure Data Engineer Associate

Start here

Build, manage, and deploy AI solutions

 Azure AI Engineer Associate

Build, train, and deploy machine learning models

 Azure Data Scientist Associate

Start here

Get insights from data assets

 Data Analyst Associate

Continue to grow with additional training

Migrate data to the cloud

Microsoft Azure certifications

Role-based

Expand your technical skill set

▼ Associate

- Azure Administrator (AZ-104)
- Azure Security Engineer (AZ-500)
- Azure Stack Hub Operator (AZ-600)
- Azure Developer (AZ-204)
- Azure Database Administrator (DP-300)
- Azure Data Engineer (DP-203)
- Data Analyst (DA-100)
- Azure AI Engineer (AI-102)
- Azure Data Scientist (DP-100)
- Azure Network Engineer (AZ-700)
- Windows Server Hybrid Administrator (AZ-800 + AZ-801)

▼ Expert

- Azure Solutions Architect (AZ-305)
- DevOps Engineer (AZ-400)

Specialty

Deepen your technical skills and manage industry solutions

- Azure for SAP Workloads (AZ-120)
- Azure Virtual Desktop (AZ-140)
- Azure IoT Developer (AZ-220)

Fundamentals

Master the basics

- Azure Fundamentals (AZ-900)
- Azure Data Fundamentals (DP-900)
- Azure AI Fundamentals (AI-900)

Exam details

AZ-900:
[Microsoft Azure Fundamentals](#)

Skills measured:

- Describe cloud concepts
- Describe core Azure services
- Describe security, privacy, compliance, and trust
- Describe Azure pricing Service Level Agreements and Lifecycles

Knowledge and experience:

A candidate for this exam should be able to demonstrate a fundamental knowledge of cloud concepts, as well as Azure services, workloads, security, privacy, pricing, and support. In addition, a candidate should be familiar with concepts of networking, storage, compute, application support, and application development.

Certification

Pass certification exam
AZ-900 to earn this certification

Microsoft Certified:
Azure Fundamentals

Azure Fundamentals validates foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have foundational knowledge of cloud services and how those services are provided with Microsoft Azure.

The journey to Microsoft Certified:

Azure Fundamentals

Get started at
[AzureCerts_Fundamentals](#)

Start here

Decide if this is the right certification for you

Upskill with recommended training and experience

Pass required exam to earn your certification

This certification is a good fit if:

- You are new to the cloud or new to Azure.

AND

- You want to demonstrate a fundamental knowledge of cloud concepts, as well as Azure services, workloads, security, privacy, pricing, and support.

[AzureCerts_DataFundamentals](#)

Exam details

Who is this certification for?

Candidates for this certification should have foundational knowledge of core data concepts and how they are implemented using Microsoft Azure data services.

DP-900:
[Microsoft Azure Data Fundamentals](#)

Skills measured:

- Describe core data concepts
- Describe how to work with relational data on Azure
- Describe how to work with non-relational data on Azure
- Describe an analytics workload on Azure

Knowledge and experience:

A candidate for this exam should be familiar with the concepts of relational and non-relational data, and different types of data workloads, such as transactional or analytical.

Certification

Pass certification exam
DP-900 to earn this certification

Microsoft Certified: **Azure Data Fundamentals**

Azure Data Fundamentals validates foundational knowledge of core data concepts and how they are implemented using Microsoft Azure data services.

Products featured

- Microsoft Azure
- Microsoft SQL Server

[AzureCerts_AIFundamentals](#)

Exam details

AI-900:
[Microsoft Azure AI Fundamentals](#)

Skills measured:

- Describe AI workloads and considerations
- Describe fundamental principles of machine learning on Azure
- Describe features of computer vision workloads on Azure
- Describe features of natural language processing (NLP) workloads on Azure
- Describe features of conversational AI workloads on Azure

Knowledge and experience:

A candidate for this exam should have knowledge of common machine learning and AI workloads and how to implement them on Azure.

Certification

Pass certification exam **AI-900** to earn this certification

Microsoft Certified:
Azure AI Fundamentals

Azure AI Fundamentals validates foundational knowledge of machine learning and AI concepts and related Microsoft Azure services.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have foundational knowledge of machine learning and AI concepts and related Microsoft Azure services.

This certification is intended for candidates with both technical and non-technical backgrounds. Data science and software engineering experience are not required; however, some general programming knowledge or experience would be beneficial.

Azure Administrator Associate

Get started at
[AzureCerts_Admin](#)

Exam details

Who is this certification for?

Candidates for this certification should have subject matter expertise implementing, managing, and monitoring an organization's Microsoft Azure environment.

Responsibilities for this role include implementing, managing, and monitoring identity, governance, storage, compute, and virtual networks in a cloud environment, plus provision, size, monitor, and adjust resources, when needed.

AZ-104:
Microsoft Azure Administrator

Skills measured:

- Manage Azure identities and governance
- Implement and manage storage
- Deploy and manage Azure compute resources
- Configure and manage virtual networking
- Monitor and back up Azure resources

Knowledge and experience:

A candidate for this exam should have at least six months of hands-on experience administering Azure, along with a strong understanding of core Azure services, Azure workloads, security, and governance. In addition, this role should have experience using PowerShell, Azure CLI, Azure portal, and Azure Resource Manager templates.

Certification

Pass certification exam
AZ-104 to earn this certification

Microsoft Certified:
Azure Administrator Associate

Azure Administrators implement, manage, and monitor an organization's Microsoft Azure environment.

Azure Security Engineer Associate

Get started at
[AzureCerts_SecurityEngineer](#)

Who is this certification for?

Candidates for this certification should have subject matter expertise implementing security controls and threat protection, managing identity and access, and protecting data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

Responsibilities for this role include maintaining the security posture, identifying and remediating vulnerabilities by using a variety of security tools, implementing threat protection, and responding to security incident escalations.

Exam details

AZ-500:
[Microsoft Azure Security Technologies](#)

Skills measured:

- Manage identity and access
- Implement platform protection
- Manage security operations
- Secure data and applications

Knowledge and experience:

A candidate for this exam should have strong skills in scripting and automation; a deep understanding of networking, virtualization, and cloud N-tier architecture; and a strong familiarity with cloud capabilities and products and services for Azure, plus other Microsoft products and services.

Certification

Pass certification exam **AZ-500** to earn this certification

Microsoft Certified:
Azure Security Engineer Associate

Azure Security Engineers implement security controls and threat protection, manage identity and access, and protect data, applications, and networks in cloud and hybrid environments as part of an end-to-end infrastructure.

[Azure Administrator training on NetCom Learning.](#)

Azure Stack Hub Operator Associate

Get started at
[AzureCerts_StackHubOperator](https://www.microsoft.com/certifications/azure-stack-hub-operator-associate)

Who is this certification for?

Candidates for this certification are Azure administrators or Azure Stack Hub operators who provide cloud services to end users or customers from within their own datacenter using Azure Stack Hub.

Responsibilities include planning, deploying, packaging, updating, and maintaining the Azure Stack Hub infrastructure. They also offer hybrid cloud resources and requested services and manage infrastructure as a service (IaaS) and platform as a service (PaaS).

Exam details

AZ-600:
[Configuring and Operating a Hybrid Cloud with Microsoft Azure Stack Hub](#)

Skills measured:

- Provide services
- Implement data center integration
- Manage identity and access
- Manage infrastructure

Knowledge and experience:

A candidate for this exam should have significant experience managing and operating Azure Stack Hub environments. They should have a strong understanding of Azure, in addition to some knowledge of virtualization, networking, and identity management. They need to understand how Azure Stack Hub enables DevOps processes and the hybrid development model.

Certification

Pass certification exam **AZ-600** to earn this certification

Microsoft Certified:
Azure Stack Hub Operator Associate

Azure Stack Hub operators provide cloud services to their end users or customers from within their own datacenter using Azure Stack Hub.

[Azure Administrator training on NetCom Learning.](#)

Azure Network Engineer Associate

Get started at
[AzureCerts_NetworkEngineer](https://www.microsoft.com/certifications/azure-network-engineer-associate)

Who is this certification for?

Candidates for this certification plan, implement, and maintain Azure networking solutions, including hybrid networking, connectivity, routing, security, and private access to Azure services.

Responsibilities for this role include managing networking solutions for performance, resiliency, scale, and security. They deploy networking solutions by using the Azure Portal and other methods, including PowerShell, Azure Command-Line Interface (CLI), and Azure Resource Manager templates (ARM templates).

Exam details

AZ-700:
[Designing and Implementing Microsoft Azure Networking Solutions](#)

Skills measured:

- Design, implement, and manage hybrid networking
- Design and implement core networking infrastructure
- Design and implement routing
- Secure and monitor networks
- Design and implement private access to Azure services

Knowledge and experience:

Candidates for this exam should have expert Azure administration skills, in addition to extensive experience and knowledge of networking, hybrid connections, and network security.

Certification

Pass certification exam **AZ-700** to earn this certification

Windows Server Hybrid Administrator Associate

Get started at
aka.ms/AzureCerts_WindowsServer

Who is this certification for?

Candidates for this certification should have subject matter expertise in configuring and managing Windows Server on-premises, hybrid, and infrastructure as a service (IaaS) platform workloads. They should have extensive experience working with Windows Server operating systems.

Responsibilities include integrating Windows Server environments with Azure services and managing Windows Server in on-premises networks.

Exam details

AZ-800:
[Administering Windows Server Hybrid Core Infrastructure](#)

Skills measured:

- Deploy and manage Active Directory Domain Services (AD DS) in on-premises and cloud environments
- Manage Windows Servers and workloads in a hybrid environment
- Manage virtual machines and containers
- Implement and manage an on-premises and hybrid networking infrastructure
- Manage storage and file services

Knowledge and experience:

A candidate for this exam administers core Windows Server workloads using on-premises, hybrid, and cloud technologies. They should have expertise in implementing and managing on-premises and hybrid solutions, such as identity, management, compute, networking, and storage.

AZ-801:
[Configuring Windows Server Hybrid Advanced Services](#)

Skills measured:

- Secure Windows Server on-premises and hybrid infrastructures
- Implement and manage Windows Server high availability
- Implement disaster recovery
- Migrate servers and workloads
- Monitor and troubleshoot Windows Server environments

Knowledge and experience:

A candidate for this exam configures advanced Windows Server services using on-premises, hybrid, and cloud technologies. They should have expertise in performing tasks related to security, migration, monitoring, high availability, troubleshooting, and disaster recovery.

Certification

Pass certification exams **AZ-800** and **AZ-801** to earn this certification

Microsoft Certified:

Windows Server Hybrid Administrator Associate

Windows Server Hybrid Administrators configure and manage Windows Server on-premises, hybrid, and infrastructure as a service (IaaS) platform workloads.

Azure Solutions Architect Expert

Get started at
[AzureCerts_SolutionsArchitect](https://azurecerts.microsoft.com/solutions-architect)

Exam details

AZ-305:
Designing Microsoft Azure Infrastructure Solutions (beta)

Skills measured:

- Design identity, governance, and monitoring solutions
- Design data storage solutions
- Design business continuity solutions
- Design infrastructure solutions

Knowledge and experience:

A candidate for this exam should have expertise implementing strategies for collaboration, code, infrastructure, source control, security, compliance, continuous integration, testing, delivery, monitoring, and feedback. Additionally, a candidate must be familiar with both Azure administration and development and must be expert in at least one of these areas.

Certification

Pass certification exam **AZ-305** to earn this certification

Microsoft Certified: **Azure Solutions Architect Expert**

Azure Solutions Architects design and implement solutions that run on Microsoft Azure, including aspects like compute, network, storage, and security.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have subject matter expertise in designing and implementing solutions that run on Microsoft Azure, including aspects like compute, network, storage, and security.

Responsibilities for this role include advising stakeholders and translating business requirements into secure, scalable, and reliable cloud solutions.

Azure for SAP Workloads Specialty

Get started at
[AzureCerts_SAPWorkloads](#)

Exam details

AZ-120:
Planning and Administering Microsoft Azure for SAP Workloads

Skills measured:

- Migrate SAP Workloads to Azure
- Design an Azure Solution to Support SAP Workloads
- Build and Deploy Azure for SAP Workloads
- Validate Azure Infrastructure for SAP Workloads
- Operationalize Azure SAP Architecture

Knowledge and experience:

A candidate for this exam should have extensive experience and knowledge of SAP applications: SAP HANA, S/4HANA, SAP NetWeaver, SAP BW/4HANA, OS servers for SAP applications and databases, Azure portal, Azure Resource Manager templates, operating systems, virtualization, cloud infrastructure, storage structures, high availability design, disaster recovery design, data protection concepts, and networking.

Certification

Pass certification exam **AZ-120** to earn this certification

Microsoft Certified:
Azure for SAP Workloads Specialty

Architects or engineers for Azure for SAP Workloads have extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the long-term operation of an SAP solution on Microsoft Azure.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should be architects or engineers with extensive experience and knowledge of the SAP system landscape and industry standards that are specific to the initial migration or integration and the long-term operation of an SAP solution on Microsoft Azure.

Responsibilities for this role include making recommendations on services and adjusting resources as appropriate for optimal resiliency, performance, scale, provision, size, and monitoring.

Azure Virtual Desktop Specialty

Get started at
[AzureCerts_VirtualDesktop](#)

Who is this certification for?

Candidates for the Azure Virtual Desktop Specialty certification are administrators with subject matter expertise in planning, delivering, and managing virtual desktop experiences and remote apps, for any device, on Azure.

Responsibilities for this role include deploying virtual desktop experiences and apps to Azure. These professionals deliver applications on Azure Virtual Desktop and optimize them to run in multi-session virtual environments. To deliver these experiences, they work closely with Azure administrators and architects, along with Microsoft 365 administrators.

Exam details

AZ-140:
[Configuring and Operating Microsoft Azure Virtual Desktop](#)

Skills measured:

- Plan an Azure Virtual Desktop architecture
- Implement an Azure Virtual Desktop infrastructure
- Manage access and security
- Manage user environments and apps
- Monitor and maintain an Azure Virtual Desktop infrastructure

Knowledge and experience:

Candidates for this certification should have experience in Azure technologies, including virtualization, networking, identity, storage, backups, resilience, and disaster recovery. They should understand on-premises virtual desktop infrastructure technologies as they relate to migrating to Azure Virtual Desktop. These professionals use the Azure portal and Azure Resource Manager templates to accomplish many of their tasks. They might use PowerShell and Azure CLI for more efficient automation.

Certification

Pass certification exam **AZ-140** to earn this certification

Microsoft Certified:

- Monitor, troubleshoot, and optimize Azure solutions
- Connect to and consume Azure services and third-party services

Knowledge and experience:

A candidate for this exam should have one to two years of professional development experience and experience with Microsoft Azure. In addition, they should have the ability to program in a language supported by Azure, plus proficiency in Azure SDKs, Azure PowerShell, and Azure CLI. They should also be proficient in data storage options, data connections, APIs, app authentication and authorization, compute and container deployment, debugging, performance tuning, and monitoring.

Certification

Pass certification exam
AZ-204 to earn this certification

Microsoft Certified: **Azure Developer Associate**

Azure Developers design, build, test, and maintain cloud applications and services.

Products featured

- Microsoft Azure

Who is this certification for?

Candidates for this certification should have subject matter expertise designing, building, testing, and maintaining cloud applications and services on Microsoft Azure.

Responsibilities for this role include participating in all phases of cloud development, from requirements definition and design to development, deployment, maintenance, performance tuning, and monitoring.

Exam details

AZ-400:

Designing and Implementing Microsoft DevOps Solutions

Skills measured:

- Develop an instrumentation strategy
- Develop a Site Reliability Engineering (SRE) strategy
- Develop a security and compliance plan
- Manage source control
- Facilitate communication and collaboration
- Define and implement continuous integration
- Define and implement a continuous delivery and release management strategy

Knowledge and experience:

A candidate for this exam should have expertise implementing strategies for collaboration, code, infrastructure, source control, security, compliance, continuous integration, testing, delivery, monitoring, and feedback. Additionally, a candidate must be familiar with both Azure administration and development and must be expert in at least one of these areas.

Certification

Pass certification exam **AZ-400** to earn this certification

Azure IoT Developer Specialty

Get started at
[AzureCerts IoTDev](https://azurecerts.io/dev)

Who is this certification for?

Candidates for this certification should have subject matter expertise creating and maintaining the cloud and edge portions of an Azure IoT solution.

Responsibilities for this role include managing the device lifecycle setup, configuration, and maintenance—using cloud services and other tools, implementing designs for Azure IoT solutions, including device topology, connectivity, debugging, and security, implementing solutions to manage, monitor, and transform IoT-related data pipelines, deploying Azure IoT Edge components, and configuring device networking on the edge.

Exam details

AZ-220:
[Microsoft Azure IoT Developer](#)

Skills measured:

- Set up the IoT solution infrastructure
- Provision and manage devices
- Implement Edge
- Implement Business Integration
- Process and manage data
- Monitor, troubleshoot, and optimize IoT solutions
- Implement security

Knowledge and experience:

A candidate for this exam should have general understanding of devices types and Azure services, including data storage options, data analysis, data processing, AI, and other platform as a service (PaaS) options. IoT developers must be able to program in at least one Azure IoT SDK-supported language.

Certification

Pass certification exam
AZ-220 to earn this certification

Azure Cosmos DB Developer Specialty

Who is this certification for?

Candidates for this certification should have subject matter expertise in designing, implementing, and monitoring cloud-native applications that store and manage data.

Responsibilities include designing and implementing data models and data distribution, loading data into an Azure Cosmos DB database, and optimizing and maintaining the solution. These professionals integrate the solution with other Azure services. They also design, implement, and monitor solutions that consider security, availability, resilience, and performance requirements.

Exam details

Exam DP-420:

Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB

Skills measured:

- Design and implement data models
- Design and implement data distribution
- Integrate an Azure Cosmos DB solution
- Optimize an Azure Cosmos DB solution
- Maintain an Azure Cosmos DB solution

Knowledge and experience:

A candidate for this exam must have solid knowledge and experience developing apps for Azure and working with Azure Cosmos DB database technologies. They should be proficient at developing applications by using the Core (SQL) API and SDKs, writing efficient queries and creating appropriate index policies, provisioning and managing resources in Azure, and creating server-side objects with JavaScript. They should be able to interpret JSON, read C# or Java code, and use PowerShell.

Certification

Pass certification exam **DP-420** to earn this certification

Microsoft Certified:
Azure Cosmos DB Developer Specialty

Azure Cosmos DB Developers design, implement, and monitor cloud-native applications that store and manage data.

Get started at
[AzureCerts_AIEngineer](#)

Who is this certification for?

Candidates for this certification should have subject matter expertise building, managing, and deploying AI solutions that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework.

Responsibilities for this role include participating in all phases of AI solutions development—from requirements definition and design, to development, deployment, maintenance, performance tuning, and monitoring.

Exam details

AI-102:
Designing and Implementing a Microsoft Azure AI Solution

Skills measured:

- Plan and manage an Azure cognitive services solution
- Implement computer vision solutions
- Implement natural language processing solutions
- Implement knowledge mining solutions
- Implement conversational AI solutions

Knowledge and experience:

A candidate for this exam should be proficient in C#, Python, or JavaScript and should be able to use REST-based APIs and SDKs to build computer vision, natural language processing, knowledge mining, and conversational AI solutions on Azure. In addition, a candidate should understand the components that make up the Azure AI portfolio and the available data storage options. A candidate also needs to understand and be able to apply responsible AI principles.

Certification

Pass certification exam **AI-102** to earn this certification

Microsoft Certified:
