Azure

Unlock your business potential by modernizing your applications with Azure

About Minsait:

Minsait is a company driven by innovation and a robust technological foundation. Our focus on delivering cutting-edge solutions to top-tier clients fuels higher growth, profitability, and long-term value creation.

What we offer

Legacy systems lack adaptability and operational as well as strategic flexibility. To address this, companies can rely on public cloud providers like Microsoft. This enables businesses to leverage cloud benefits such as agility, scalability, versatility, availability, and resilience. This is where the concept of application innovation comes into play, which refers to the transition to the cloud and the adoption of modern technologies and architectures with tremendous potential.

At Minsait, our App Modernization framework accelerates Azure deployment with a holistic vision across six pillars: Azure Strategy, Modernization Plan, Cloud Adoption, Cloud Architecture, Modernization Execution, and Governance and Coexistence.

Adding Value...

Our deep understanding of both business and technology allows us to provide customizable solutions aligned with your specific business needs, enhancing scalability, reducing TTM, and ensuring 100% infrastructure availability.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
