

Workplace Technology Modernisation – Teams

Organisations around the world have rapidly deployed Teams and PowerPlatform to maintain business continuity and provide secure integrated communications, collaboration and business applications. We can help you to increase the value you get from Teams through:

- **Teams Rapid Deployment** enabling **secure hybrid remote working at scale and increased business resilience**. We can roll the platform out, drive user adoption, establish a pragmatic operating model and put an interim support service in place **in days**.
- **Workplace applications** - our studios and application factories can help you to envisage, design, rapidly build, integrate, test, deploy and continuously improve team and **user centric applications** that use native **Teams and PowerPlatform capabilities** e.g. workflows to **improve performance and reduce costs** with some industry solutions offering **Teams consumption based pricing**.
- **Communications modernisation** migrate your unified communications to Teams to **reduce costs and complexity associated with legacy systems** whilst improving employee experience and integration with other Microsoft products and services.
- **Citizen and Customer Experience** using Teams B2C organizations can now deliver **secure services to citizens and customers remotely** increasing convenience, reducing overheads and observing social distancing requirements
- **Evergreen IT** – modernize your IT operating model to **reduce cost and risk** associated with continuous technology change. Leverage new capabilities to **change the way work gets delivered** and drive **competitive advantage**.
- **Analytics** – Identify patterns and surface insights to help **protect employee wellbeing, increase engagement, uplift performance and promote continuous learning**.

How can Avanade **help you?**

Let's have a **2-hour conversation** about how a great Workplace Experience has helped some of our clients in your industry.
