

Hetki is dedicated to creating a world ..

.. where high-value insights from customer conversations and intelligent assistance are easily accessible at your fingertips, empowering you to achieve more and succeed in your role!

hetki

- Representatives, decision makers, and teams no longer need to rely solely on their intuition. Instead, they can make informed decisions based on data and insights about their market and customers.
- Sales managers can now provide targeted feedback to their team members without having to spend 45 minutes listening to each call.
- New team members can easily navigate the onboarding process by observing successful sales calls.
- Anyone can stay focused during a conversation and avoid the need for taking notes by using tools that track key points automatically.

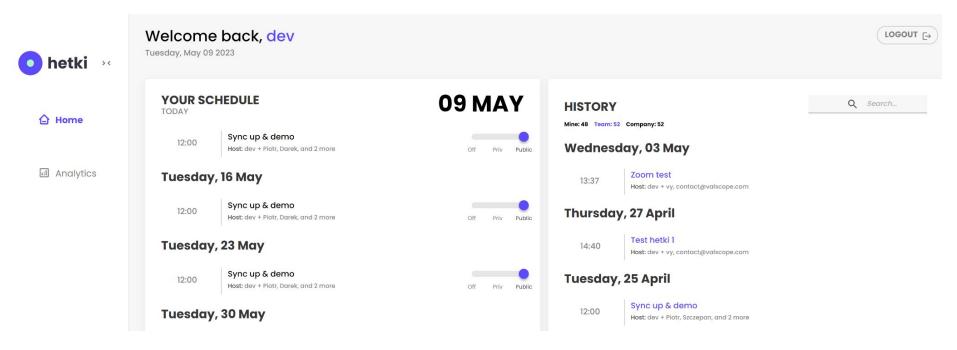

Hetki assists you with,

automatically recording, transcribing, and highlighting key insights from every conversation you have via Google Meet, MS Teams, and Zoom. Additionally, you can easily share, collaborate, search, and archive every word of these conversations to streamline your workflow and stay organized.

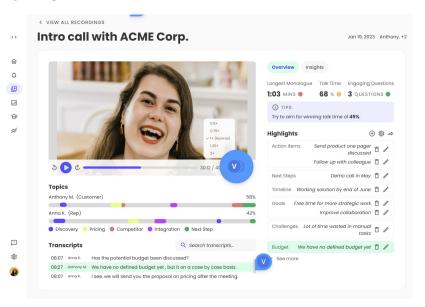

- Easily view your schedule and upcoming meetings at a glance.
- Quickly search through your past and upcoming meetings to find the information you need.
- Mark meetings as private or public to control who can view the details of each meeting.

- Hetki provides both video and transcript of your conversations, giving you multiple ways to review and analyze the content.
- Hetki's advanced technology detects key topics and provides valuable insights and highlights from your conversations, making it easy to identify important information quickly.
- You can easily share, search, and edit your conversations, making it simple to collaborate and stay organized.

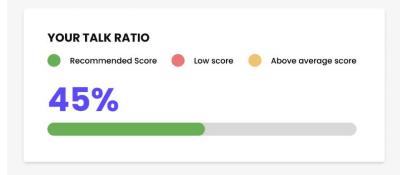

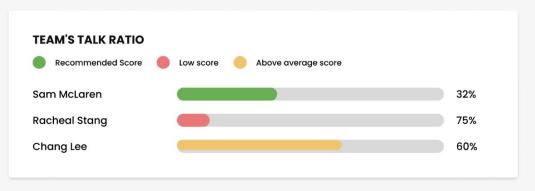

- Hetki's analytics provide valuable insights into your conversation data, helping you identify trends, improve performance, and make informed decisions.
- Hetki's intelligent recommendations use machine learning to suggest personalized action items based on your conversation data, helping you take targeted steps to improve your productivity and achieve your goals.

Analytics

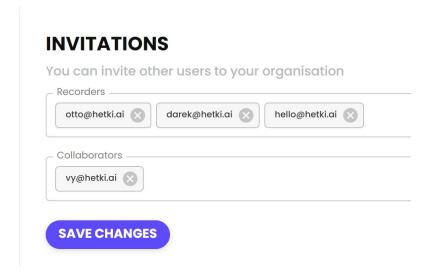

You can find useful insignts about your meetings here

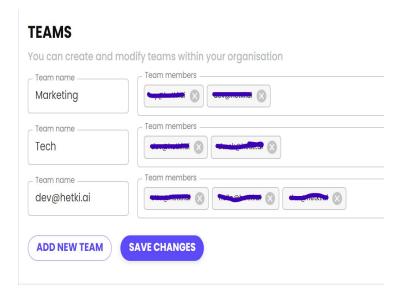

- Hetki enables you to create teams, making it easy to collaborate with others and streamline your workflow.
- You can manage users within Hetki, assigning roles such as recorders and collaborators to control who can access and contribute to your conversations.

Use cases - Recording users

Hetki provides **visibility** into your team's conversations and performance through real-time data, giving your leadership and teams the insights they need to make informed decisions and improve overall productivity.

Prepare for **follow-up** meetings with customers by reviewing key areas discussed in previous calls using Hetki. This ensures that you focus on what matters most to your customer and can execute deals more effectively.

Use recorded calls to **onboard** and **coach** employees effectively with Hetki. Managers can quickly listen to, find, and share calls, and easily leave notes and provide feedback that results in meaningful learning opportunities for team members.

Use cases - Collaborators

Hetki enables **customer-centric product and service development** by allowing product managers to hear customer needs directly, without having to spend hours in sales meetings. This ensures that your products meet the needs of your customers and are more likely to be successful.

With Hetki, your team can gain early insights into what's working and what's not, providing the confidence needed to take big-bet **initiatives** to market successfully. This helps your team make informed decisions and take **strategic actions** that will drive success for your organization.
