COLLABORATE WITHOUT LIMITS

Simple, intelligent and effortless Data Access Governance for Microsoft 365

Imagine a world where users can collaborate freely, data access is under control, compliance is a breeze, and the whole thing runs itself. It's how we bring the phrase, 'collaborate without limits' to life.

THE PROBLEM WE SOLVE

Microsoft 365 makes it so easy for users to share access to Teams, sites and files. As businesses evolve, data sprawls and permissions lapse.

'*Who needs access to what*' is a big, complex, moving target. IT teams cannot keep up with manual processes and tools. Every file with inappropriate access is a potential security risk, and proving control is key for compliance.

HOW WE SOLVE IT

Torsion delivers powerful visibility and control of '*who has access to what*' in Microsoft 365.

Torsion empowers data owners to take responsibility for their own data, because they understand their data best.

And its intelligent automation eliminates inappropriate permissions on a massive scale...in real time, on auto-pilot.

THE GAP IN MS365

Microsoft 365 is a world-beating system for business collaboration and information management and includes some amazing, powerful capabilities for security and compliance.

But '*who has access to what*' always spirals out of control over time.
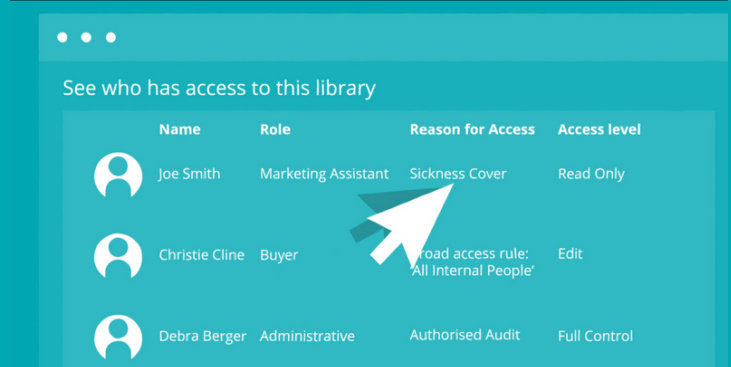

Torsion fills the Data Access Governance gap in the Microsoft 365 stack, for powerful visibility and control of '*who has access to what*'.

"Torsion fills in some of the gaps that Microsoft doesn't cover. It works perfectly with our technology, which is why we partner with them to bring you an end to end view of how you can control your data."

Security & Compliance Lead, Microsoft UK

HOW IT WORKS

As users constantly share data access, Torsion delivers powerful visibility and control of '*who has access to what*' in Microsoft 365.

See who has access to this library

Name	Role	Reason for Access	Access level
Joe Smith	Marketing Assistant	Sickness Cover	Read Only
Christie Cline	Buyer	road access rule: 'All Internal People'	Edit
Debra Berger	Administrative	Authorised Audit	Full Control
