

Azure Well-Architected Assessment

Examine your workload through the lenses of reliability, cost management, operational excellence, security and performance efficiency.

Our Azure Well-Architected Assessment program aims to assist organizations in establishing sound architectural practices, mitigating risks, and adapting swiftly to changes impacting solution design, application development, management, and workloads. Our team consists of Microsoft certified experts who excel in building top-tier Azure solutions, implementing industry best practices, assessing workload conditions, and making necessary enhancements to align with business and customer requirements.

Full Visibility Across the 5 Pillars of the Well-Architected Framework

OPERATIONAL EXCELLENCE

SECURITY

RELIABILITY

PERFORMANCE EFFICIENCY

COST OPTIMIZATION

What We Do, And How We Do It Differently

Comprehensive services for all Microsoft security tools

Multi-cloud expertise to support custom architecture design and management

Services for unified calling, meeting, and collaboration with Microsoft Teams

Custom built applications and integrations in your Azure and Microsoft 365 environments

Artificial intelligence solutions for data-driven businesses

24x7 service desk with rapid remediation times

We're In This Together

Netrix Global helps companies just like yours solve business impacting challenges.

Increased Satisfaction

Netrix implemented Zappos' new monitoring system, which reduced error rates by 95% and improved overall latency by 50%.

Blazing Fast Response Time

Netrix Global swiftly responded to a ransomware attack, securing endpoints and restoring business operations within 90 minutes.

Partnership You Can Trust

Our valued clients have consistently praised the exceptional level of trust, partnership, and improved service provided by Netrix.

Microsoft GCC Certified

Advanced Specialization
Microsoft Threat Protection | Identity and Access Management | Information Protection and Governance | Adoption and Change Management

Member of Microsoft Intelligent Security Association

20/20 Microsoft Security Award Finalist

2020 Top Microsoft 365 Workshop Partner
