Secure Multicloud Environments Workshop

Get a customized threat and vulnerability analysis of your hybrid and multicloud environment and learn how to build a more robust cloud security system.

How aware are you of the security vulnerabilities in your hybrid and multicloud environment including VMs, databases, Microsoft® Azure® storage and more? Are you aware of the number of suspected authentication activities across your multicloud environment? In short, how confident are you in your organization's security posture?

Given the volume and complexity of identities, data, applications, endpoints and infrastructure, it's essential to learn how secure your organization is right now, and how to mitigate and protect against threats moving forward.

With a Secure Multicloud Environments Workshop from Rackspace Technology, we can help you develop a strategic plan customized for your organization and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multicloud environments, plus guidance on how to improve your security posture for the long-term.

Experts Dedicated to Your Success

When it comes to meeting compliance requirements, many organizations need the help of an experienced partner. With over two decades of experience helping customers succeed in the cloud, Rackspace solves more than workload problems; we help create business advantages. Whether you're looking to spur innovation and agility, reduce costs or build operational efficiencies, Rackspace Technology has thousands of experts ready to put cutting-edge capabilities to work for your business.

Key Benefits

- Identify current security threats and vulnerabilities in your hybrid and multicloud environments
- Learn how to prioritize and mitigate potential threats to your servers and services
- Learn how to reduce your attack surface area in a hybrid cloud
- Learn about benefits and capabilities of Microsoft Defender for Cloud and Azure Network Security
- Walk away with actionable next steps based on your specific needs and objectives

About Rackspace Technology

Rackspace Technology® is your trusted partner across cloud, applications, security, data and infrastructure.

- 2,600+ certified technical experts
- Hosting provider for more than half of the Fortune 100
- 20+ years of hosting experience
- Customers in 120+ countries
- Five-time Microsoft Hosting Partner of the Year
- Microsoft-Certified Gold Partner
- 2,700+ Microsoft Certifications
- 84+ Microsoft Security Certifications including Azure Security Engineers
- Solutions Partner for Security with Advanced Specializations:
  - Cloud Security & Threat Protection
- Microsoft Intelligent Security Association Certified MSSP

Microsoft Partner
Azure Expert MSP

Microsoft

Fanatical Experience®

Experts on your side, doing what it takes to get the job done right. From first consultation to daily operations, Rackspace Technology combines the power of always-on service with best-in-class tools and automation to deliver technology when and how you need it.

Workshop Overview

Pre-engagement Call → **Kick-off Meeting** → **Data Collection** → **Threat Exploration** → **Results Presentation** → **Engagement Decommissioning**

During this workshop, you'll learn how to strengthen hybrid cloud security, and how to prioritize and mitigate vulnerabilities. We will help you:

- Analyze your requirements and priorities for a hybrid cloud security detection and response solution
- Define scope and deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services
- Explore Azure Network Security capabilities and experience selected Azure Network Security products in a demonstration environment
- Discover existing hybrid workload vulnerabilities and learn how to reduce the attack surface area
- Discover threats to the included hybrid workloads and demonstrate how to investigate and respond to threats
- Move forward with recommended next steps on continuing with a production deployment of Microsoft Defender for Cloud and Azure Network Security

Take the Next Step

Let's talk about how Rackspace Technology security expertise can help you shore up multicloud vulnerabilities.
