

Mergers & Acquisitions with GCC High

Organizations that are combining organizations, that include meeting US Government specific compliance, are eager to seek the benefits of their business transaction while faced with a technical complexity to achieve their desired goals.

It all starts with **IDENTITY**

Identity is at the heart of all M&A projects which often includes existing Microsoft 365 tenants, local Active Directories, and other SaaS applications

What **We'll Do**

Agile IT provides implementation, planning, deployment, and migrations for organizations that are combine various systems which include Microsoft 365.

What We Offer

Agile IT provides implementation, planning, deployment, and migrations for organizations that combine various systems which include Microsoft 365.

- ✓ Provisioning and Licensing for Microsoft 365 GCC High
- ✓ Tenant to Tenant Migration
- ✓ Email Migration
- ✓ File Migration
- ✓ Security & Compliance
- ✓ Mobile and Desktop

Government Compliance

The US Government is defining stricter requirements with both audits and serious penalties that require customers to move to Microsoft 365 for GCC High.

- International Traffic in Arms Regulations (ITAR)
- Cybersecurity Maturity Model Certification
- Executive Order on Improving the Nation's Cybersecurity
- FedRAMP High

Our Process

1 Identity & Tenant Transition

Identify all sources of identity and create a plan for rationalization, consolidation, licensing transition, and migration execution

2 Data Migration and Access

Define and execute a migration plan that focuses on the key data to move aligned with your identities

3 Security Enablement

Define, configure, and provide guidance on leveraging Microsoft 365 and Azure to set a baseline or improve the security posture

Microsoft Licensing Preparation

Understanding your existing licensing and creating a plan during the transition is a key activity Agile IT focuses on during all M&A projects. Regardless if Agile IT is or will be your licensing partner.

-  Vendor consolidation
-  Reduce risk of over or under licensing
-  Understanding the available options with customer selected licensing

Beyond Microsoft Cloud Services

Customers often have other IT services that are traditional on-premise infrastructure, other cloud providers, and SaaS applications that must be incorporated into the initial plan and roadmap. Agile IT provides these services to:

- Reduce user and IT complexity
- Reduce security risks
- Improve compliance requirements
- Reduce vendors, costs, and contracts

Multiple Tenants
