# ADFS Microsoft Entra ID App Migration

Enjoy Microsoft Entra ID's functionality for yourself.

Workshop highlights

- Seamless Single Sign-On and Microsoft Entra ID MFA
- Enhanced security, identity, and response capabilities
- A smooth transition, limiting disruption for end users
- Enjoy features such as Password Hash Sync

Simplify the move from ADFS to Microsoft Entra ID.

Many organisations who are currently using ADFS are looking to utilise the enhanced functionality of Microsoft Entra ID and its myriad of advanced threat protection features – but they don't know where to start.

Despite its popularity, organisations using ADFS face a higher risk of vulnerabilities than their peers and competitors – many of whom are benefitting from Password Hash Sync, incorporated with Pass-through authentication where enforcement of on-premises AD policies apply.

It's possible, however, to undertake a seamless migration, improving security, offering up new features, and getting organisations back on track. With Microsoft Entra ID's enhanced functionality, new possibilities also open up for organisations – the sky is truly the limit.

Who is This For?

Organisations that are wanting to move from ADFS to utilise the enhanced functionality of Microsoft Entra ID, including advanced identity protection features.

Solution Objective

✓ Assist with transition from ADFS to Microsoft Entra ID
✓ Introduce greater security and identity measures
✓ Migrate users from ADFS to Microsoft Entra ID for authentication
✓ Minimise disruption for end users

What We'll Do

✓ An initial workshop (remote or on-site) to gather information about key systems.
✓ Staged migration to Microsoft Entra ID as the Identity Provider
✓ Defederation of ADFS
✓ Supporting documentation

What Will The Outcomes Be?

- ✔ A seamless and secure transition to Microsoft Entra ID
- ✔ Access to Microsoft Entra ID's myriad features
- ✔ Enhanced security and response capabilities

Why Performanta?

Founded in 2010, Performanta is a leading Microsoft Solutions Partner for both Modern Work and Security, with Security Specialisations Identity and Access Management, and in Threat Protection. Performanta became one of the world's first FastTrack Ready Security Partners (FRSPs) and joined the Microsoft Intelligent Security Association (MISA), placing Performanta firmly as a leader in the cyber security space. Performanta has also achieved Microsoft verified MXDR solution status.

As an award-winning Managed Cyber Security Services Provider, Performanta has been pioneering cyber safety, working tirelessly to achieve two things for our clients: lowering the risk and limiting the impact of a successful cyber attack. We work with large and small clients across the world and are experts in cyber security and cyber safety. Our Microsoft Consultancy, Managed Sentinel SOC and MDR teams are experts in their fields, and our services are essential to our customers in today's world where cyber threat is greater than ever.
